MONDAY, APRIL 1 (CONTINUED)

3:20 - 3:40 P.M.
Functional analysis of 5’ UTR mutations in prostate cancer reveal dynamic regulation of clinically relevant gene networks
SS09 - NextGen Stars Spotlight 2: Site-Specific Cancers
• Yiting Lim, Sonali Arora, Lukas Corey, Matthew Fitzgibbon, Qin Zhang, Jeffrey Delrow, Ilsa Coleman, Colm Morrissey, Peter S. Nelson, Andrew C. Hsieh
• Georgia World Congress Center — Georgia Ballroom 1 - Bldg C

4:20-4:35 P.M.
2726 - Functional multiomic profiling identifies Aurora kinase inhibition as a therapeutic strategy in RIT1-mutant lung adenocarcinoma
MS MCB 9.01 - Structural and Functional Cancer Genomics
• Atheas Vichas, Naomi Nkinsi, Alice Berger
• Georgia World Congress Center — Georgia Ballroom 1 - Bldg C

SATURDAY, MARCH 30

11:15 - 11:40 A.M.
Neutrophils contribute to anti-PD1 treatment failures in NSCLC
EO26 - Diverse Functions of Neutrophils in Cancer
• McGarry Houghton, M.D.
• Georgia World Congress Center — Room B312

SUNDAY, MARCH 31

7:00-7:05 P.M.
Cancer Immunology Research: Update from the Editors-in-Chief
TM01 - Cancer Immunology Working Group [CIMM] Town Hall Meeting and Networking Reception
• Phil Greenberg, M.D.
• Georgia World Congress Center — Room A311

MONDAY, APRIL 1

10:30 - 10:55 A.M.
Epigenetic drivers and vulnerabilities in small-cell lung cancer
AOS10 - Small-Cell Lung Cancer: A Glimmer of Light at the End of the Tunnel
• David MacPherson, Ph.D.
• Georgia World Congress Center — Room B312

11:35 A.M. - NOON
Deconstructing tumor-infiltrating T-cell heterogeneity through analysis of antigen specificity
SY10 - Organ Specific Immunity
• Evan Newell, Ph.D.
• Georgia World Congress Center — Georgia Ballroom 2 - Bldg C

TUESDAY, APRIL 2

8 A.M. - NOON
3208 / 18 - Using T cell engineering plus triple checkpoint blockade to enhance the efficacy of adoptive immunotherapy in ovarian cancer
PO.IM02.01 - Combination Immunotherapies 2
• Kristin Anderson, Madison Burnett, Valentin Voillet, Edison Chiu, Breanna Bates, Nicolas Garcia, Raphael Gottardo, Phil Greenberg
• Section 23
TUESDAY, APRIL 2 (CONTINUED)

8 A.M. - NOON
LB-170 / 3 - Breast cancer incidence and hormone therapy use before and after the Women’s Health Initiative (WHI) estrogen (E) plus progestin (P) trial by race/ethnicity
LBPO.EP01 - Late-Breaking Research: Epidemiology
• Aaron Aragaki, Garnet Anderson, Ross Prentice
• Section 40

2:05 - 2:30 P.M.
Prospects for epigenetic therapy for breast cancer
Session SY41-144 - Advancing Epigenetic Therapies for Solid Tumors
• Nancy Davidson, M.D.
• Georgia World Congress Center — Marcus Auditorium - Bldg A

1-5 P.M.
4345 / 5 - A large-scale RNA-seq screen to identify regulators of alternative splicing in cancer
PO.MCB09.02 - Functional Genomics
• April Lo, Maria McSharry, Alice Berger
• Section 34

WEDNESDAY, APRIL 3

8 A.M. - NOON
4770 / 1 - Programming tumor-clearing macrophages with targeted in situ gene therapy
PO.ET08.01 - Gene- and Vector- based Therapy
• Fan Zhang, Michael Coon, Neha Parayath, Sirrka Stephan, Smitha Pillai, Matthias Stephan
• Section 12
