

Monthly Safety Tips – Fit Testing

Employee Health & Safety Committee

N95s Require Fit Testing

If you wear an N95 mask, you must be fit tested and complete the respiratory fit testing training requirement on an annual basis. The medical evaluation needs to be completed every 3 years.

Fit Testing Requirements

There are a few steps you need to complete prior to your fit test

- Complete the annual Respiratory Protection Module on the learner dashboard
- Complete a medical evaluation (once every three years)
- Drop-in for fit testing or schedule an appointment

Need help?

If you have questions or need assistance with completing any of the Respiratory Fit Testing requirements, reach out to rpp@seattlecca.org
