
FUNDS AVAILABLE FOR PILOT STUDIES EXPANDING CLINICAL TRIALS FUNDING MECHANISM

CYCLE 2 RELEASE DATE: MAY 1, 2025 (Updated 1/22/26)

DUE DATE: ROLLING SUBMISSION

FUNDING DATES: FUNDS WILL BE AWARDED IN FISCAL YEAR '26 (July 2025-June 2026)

Funding is available from the HICOR/Fred Hutch Clinical Trials Expansion program to support cancer-related pilot projects. Our goal is to support the launch of pilot studies in partnership with community oncology clinics that are directly responsive to clinic- and patient-identified needs. This mechanism will provide awards of up to \$75,000 direct costs (final amount dependent on FY26 program budget) for one year to support pilot feasibility studies. Funded studies should involve participant consent/enrollment.

Proposed projects should:

- Focus on improving cancer care delivery and/or the care experience for patients
- Be designed in a way that minimizes start up burden for clinics (e.g., fits into clinic workflow) and facilitates patient participation
- Enroll participants in the CCSG catchment area

HICOR is particularly interested in submissions that address the following topics:

- Palliative Care
- Patient Navigation
- Telehealth
- Survivorship

PI of the application must have some measurable effort on the project for direction and supervision. Consortium leadership recommends the PI include some salary on the project.

Primary Site Fred Hutch:

- Hutch Grants routing will be required only after an award is made.
- UW or Children's collaborators are allowable and a subaward should be budgeted.

Primary Site UW or Children's:

- Institutional sign-off should be received prior to submission of pilot application.
- An LOI must accompany the pilot application.
- Per UW OSP, submit an e-GC1 anticipating that if awarded, only direct costs will be received.

Primary Site UW or Children's with a FH budget component:

- A FH co-investigator (or administrative PI) needs to be named to maintain financial oversight of the work taking place at FH. This person should have a measurable amount of effort; salary support is not required.
- Funds to be spent at FH will be deducted from the award amount prior to issuing the subaward; the balance will be issued via subaward to UW or Children's.

RESEARCH PLAN (2 pages maximum)

- FH direct cost budget and UW/Children's direct budget should not exceed \$75,000 combined.

APPLICATION INSTRUCTIONS

Background & Rationale: If interventional, comment on whether clinics and/or patients benefit from the intervention.

Specific Aims & Activities: Include the primary study question, a description of the intervention (if applicable), the primary outcome and study timeline. Comment on timeline for pre-enrollment activities, enrollment, and analysis phase. Comment on feasibility considerations for clinic

Data Sources and Sample Population: Eligible population, number of community clinic(s) anticipated to establish feasibility.

Feasibility Considerations: Comment on the overall anticipated impact on the clinic workflow. This can include the anticipated training required for clinic staff, recruitment procedures, whether clinic or Consortium personnel will administer the intervention, and method for collecting outcomes.

TO SUBMIT YOUR APPLICATION or for questions about the Trials Expansion Program, contact Talor Hopkins (thopkins@fredhutch.org).

RESEARCH PLAN (2 pages maximum)

PROJECT TITLE:

Does the proposed study have other sources of funding? Yes No

Other funding source(s), if applicable: _____

IRB Number: _____ Approval date: _____

(IRB approval must be obtained if this grant is awarded and before any funds will be activated.)
