Biomedical Research Internships

The following catalog features approximately 280 biomedical research internships offered nationwide for high school, undergraduate, post-baccalaureate, graduate, and first-year medical students. This catalog is organized by academic level and discipline and the programs are alphabetized according to the name of the sponsoring institution or organization. For more information about a specific internship, please refer to the program's website or contact the respective administrator.

*Note: This document is updated annually in the Fall, and was last updated 9/20/21. If you would like your program to be featured in this compilation, please contact Marilyn Drennan.

Internships in Scientific Research for High School Students

| City of Hope (California) | The Roberts Summer Academy offers high school and undergraduate students an opportunity to spend 10 weeks at the City of Hope as a member of a biomedical research team. This experience is designed to promote the development of critical thinking and scientific communication skills. | ✓ At least 16 years of age before their internship begins.  
✓ U.S. citizen or permanent resident.  
✓ Must be high school or undergraduate student. | Students will receive a $4,000 stipend.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |
| Indiana University, Melvin and Bren Simon Cancer Center (Indiana) | The Indiana University Simon Cancer Center Summer Research Program (SRP) aims to increase the number of high school students from underrepresented populations pursuing biomedical and behavioral science careers by providing positive and meaningful firsthand exposure to these fields. Students will gain exposure to a wide range of basic science, translational and clinical research activities and continually interact with and learn from other students, clinical and post-doctoral fellows, and faculty. Interns will also attend weekly workshops that deal with issues related to gaining admission to graduate and professional programs of study. | ✓ Have completed their senior year by the program’s start date.  
✓ Display an aptitude for science and math.  
✓ Academic minimum: 3.0 GPA. | Students will receive a stipend as part of their participation in the program.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |
| Lillehei Heart Institute (Minnesota) | The Lillehei Heart Institute offers their Summer Research Scholars Program for students with the opportunity to learn about cardiovascular science and medicine. Working in a lab with a faculty mentor, participants will be exposed to clinical, industrial, and academic medicine. Students will also be able to tour the Visible Heart Lab in addition to participating in a guided heart dissection. | ✓ Junior or senior standing at time of application.  
✓ Be 16 years of age or older.  
✓ Must be a U.S. citizen. | Students will receive a stipend.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |
| Maine Medical Center Research Institute (Maine) | The Maine Medical Center Research Institute (MMCRI) offers pre-college and undergraduate students an opportunity to engage in biomedical science research in a broad range of areas, including: Vascular Biology, Stem Cell Biology, Developmental Biology, Neurobiology, Hematology, Nephrology, Tumor Biology, and Molecular Genetics. | ✓ Recent high school graduate OR currently enrolled, full-time undergraduate student.  
✓ Must be 18 years of age by June.  
✓ Academic minimum: 3.0 GPA  
✓ Eligible for employment in the U.S. | Students will receive $12.50 per hour.  
Students are responsible for their own transportation and housing.  
For more information, visit the website.  
If you have additional questions, please send an email to the Education Coordinator. |

| NASA STEM Programs (Multiple locations) | NASA internships leverage NASA’s unique missions and programs to enhance and increase the capability, diversity and size of the nation’s future science, technology, engineering and mathematics (STEM) workforce. Internships are available from high school to graduate level. Internships provide students with the opportunity to participate in either research or other experiential learning, under the guidance of a mentor at NASA. | ✓ U.S. citizen.  
✓ High school sophomore, junior or senior at least 16 years of age.  
✓ Academic minimum: 3.0 GPA.  
✓ Additional eligibility requirements may apply depending on the specific program. | *Note: Projects vary at every center each session (fall, spring, summer). Once you complete an application, you will be able to view the available projects for the specified session. You can use filters to locate specific projects that meet your desired geographic location and skill sets. For more information, visit the website. |
| National Institutes of Health (Maryland) | The National Institutes of Health Division of Cancer Epidemiology and Genetics hosts a research experience designed for students interested in exploring careers in cancer epidemiology and genetics. Students may also attend lectures offered under the NIH Summer Seminar Series, participate in DCEG meetings and seminars, attend formal NIH lectures, and participate in the DCEG Poster Day. | ✓ High school OR undergraduate OR graduate student (including medical and dental students).  
✓ Must be 17 years of age or older by June 15.  
✓ U.S. citizen or permanent resident. | Participants will receive a stipend based on academic level. Students are responsible for housing, meals, and transportation. *Note: Nearby housing is available. For more information, visit the website. If you have additional questions, please send an email to the Summer Internship Coordinator, Ms. Diane Wigfield. |
| National Institutes of Health (Maryland) | The STEP-UP Program is designed to expose underrepresented and/or disadvantaged students to research in the areas of diabetes, endocrinology, metabolism, nutrition, obesity, and digestive, liver, urologic, kidney, and hematologic diseases. The program begins with an online ethics course, followed by travel to the assigned research location to begin the 8-10 week, full-time summer research experience. The program culminates with a trip to the Annual Undergraduate STEP-UP Scientific Session and Research Presentations in August. Students will present their summer research to peers, mentors, and scientific experts. | ✓ High school student junior or senior (at least 16 years of age) during application period.  
✓ Academic minimum: 3.0 GPA  
✓ U.S. citizen, non-citizen national or legal permanent resident.  
✓ Member of an underrepresented group in biomedical sciences (as shown by the National Science Foundation) OR have been diagnosed with a disability OR from an economically disadvantaged background (as defined by annual family income) OR be the first generation in family to graduate from a four-year college or university. | Students will receive a stipend. In addition, accommodations and travel expenses to the annual research symposium in Bethesda, Maryland are provided. Students are responsible for travel to and from the research location, housing, ground transportation, parking, and meals. For students opting to perform their research with a mentor at one of the coordinating institutions, a limited amount of on-campus housing may be available; students should inquire within that institution. For more information, visit the website. If you have additional questions, please send an email to Dr. Rob Rivers. |

| National Institutes of Health (Maryland)             | Participants in the **High School Summer Internship Program** (HS-SIP) work one-on-one with some of the leading scientists in the world. Trainees on the main campus in Bethesda, MD will attend a lecture series featuring distinguished NIH investigators, informal lunchtime talks on training for research careers, and participate in a trainee poster session. | ✓ Must be at least 17 years of age by start of program.  
✓ High school junior or senior at the time of application.  
✓ U.S. citizen or permanent resident.                                    | The stipend for trainees is adjusted annually.  
**For more information**, visit the [website].  
If you have additional questions, please send an email to the program.                                          |
| Pathways to Science (Multiple locations)             | **Pathways to Science** supports pathways to science, technology, engineering, and mathematics [STEM] fields. The program places emphasis on connecting groups traditionally underrepresented in STEM fields with programs, funding, mentoring, and resources. Pathways to Science hosts a website that enables users to search for summer research opportunities, graduate fellowships, and postdoctoral positions. | ✓ Please refer to the program’s website or contact the respective administrator to review the eligibility criteria per program.                            | The stipend is adjusted annually.  
**For more information**, visit the [website].                                                                 |
| Rosetta Institute of Biomedical Research (California) | The **Rosetta Institute of Biomedical Research** offers an advanced class for high school students interested in a career in medicine or related fields. Through engaging lectures and hands-on laboratory classes, students learn normal molecular and cellular biology and how these normal processes are distorted during the development of cancer. At the culmination of the workshop, students create an original research project on a gene of their choice. Participation in the cancer workshop will enable attendees to: Learn and apply molecular biology and molecular laboratory techniques; Establish a solid foundation from which to learn how any disease develops; and how to ask the important questions and answer these questions in a systematic and scientific way. | ✓ Must be 14-18 years of age and have taken high school biology. Exceptions are made for students constrained by certain circumstances or for students with exceptional backgrounds.  
✓ *Residential fees for all workshops are $3,680. There are a limited number of non-residential commuter spots available for $2,180 (includes lunch and all activities).  
*The residential price includes:  
• Room and board;  
• Roundtrip transportation to/from the airport; and  
• Field trips/recreational activities. | **For more information** and/or to apply, visit the [website].  
If you have additional questions, please send an email to the program. |

<td>Roswell Park Cancer Institute (New York)</td>
<td><strong>The Summer Cancer Research Experience Program for High School Student</strong> is designed to provide high school students an opportunity to learn and become active participants in cancer research. The major objectives of the high school program are to introduce students to scientific research through a project supervised by graduate faculty members and give students an opportunity to discover and experience the graduate student lifestyle. All students present their research poster during a scientific conference at the conclusion of the program. ✓ Enrolled in junior year of high school within the following counties in western New York: Erie, Niagara, Cattaraugus and Chautauqua. ✓ 15 years of age or older at the start of the program. ✓ Resident (permanent address) of the following counties in western New York: Erie, Niagara, Cattaraugus, and Chautauqua. ✓ All participants will be required to show proof that they are fully vaccinated with a COVID-19 vaccine authorized by the US Food and Drug Administration (FDA) or the World Health Organization (WHO). ✓ U.S. citizen or permanent resident. The program fee is $65. Limited funding is available to support subsistence allowances for a select number of applicants to the summer program. These subsistence allowances are awarded based on the qualifications of applicants and eligibility criteria required by our outside funding sources. You must pay the program fee regardless of funding status. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please contact the program.</td>

<tr>
<td>Stanford School of Medicine (California)</td>
<td>Stanford Institutes of Medicine <strong>Summer Research Program</strong> (SIMR) is an 8-week training opportunity for high school students. Participants will perform basic research with Stanford faculty, post-doctoral fellows, and graduate students on a medically-oriented project. The program is designed to increase interest in the biological sciences and medicine, help students understand how scientific research is performed, and increase the diversity of students and researchers in the sciences. ✓ U.S. citizen or permanent resident. ✓ High school student of at least junior or senior standing as of the spring. ✓ Must be at least 16 years old by the start of the program. ✓ Students from groups traditionally underrepresented in the sciences or economically disadvantaged households are particularly encouraged to apply. Students are responsible for housing, meals, and transportation. All students are given a $500 minimum stipend. Stipends of $1500 and above are given on a needs-based system from special grants. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program.</td>

| Stanford School of Medicine (California)             | The **Stanford Medical Youth Science Program (SMYSP)** is a five-week online science-and-medicine-based enrichment program. The program is designed to bolster students’ science skills while providing exposure to a host of health-related careers. | ✓ U.S. citizen or permanent resident.  
✓ Resident of specific Northern or Central Californian counties (see application).  
✓ Current junior high school student.  
✓ Students from a low-income family OR a family with little or no history of attending college. | **For more information**, visit the [website](#) or contact the program via [email](#). |
| STEP-UP (Multiple locations)                        | The **Short-Term Research Experience for Underrepresented Persons (STEP-UP)** provides hands-on summer research experience for high school and undergraduate students interested in exploring research careers.  
The STEP-UP program for high school students is administered at multiple institutions, all of which offer 8 - 12 weeks of full-time research experience and a flexible start date. The program culminates with an all-expense paid trip to the Annual STEP-UP Scientific Research Symposium. | ✓ U.S. citizen or permanent resident.  
✓ High school student of junior or senior standing. Must be at least 16 years old.  
✓ Academic minimum: 3.0 GPA.  
✓ Come from a group traditionally underrepresented in the sciences OR from a disadvantaged background as defined by annual family income and/or on track to be a first-generation college student in their family OR diagnosed with a disability. | **For more information**, visit the [website](#).  
If you have additional questions, please send an email to Dr. Rob Rivers. |
| University of Texas MD Anderson Cancer Center (Texas)| Students selected for the **King Foundation** program are given a rare opportunity to participate in a research project under the guidance of a full-time member of the MD Anderson faculty. The majority of the time is spent doing actual hands-on work that provides the students with a clear knowledge of exactly what it means to be a biomedical researcher as well as an understanding of the discipline required. The laboratory experience is supplemented by seminars presented by faculty on a wide variety of research topics and by activities exclusive to participants of all the Summer Programs. | ✓ Enrolled in a Texas public, private or charter high school as a senior-level student during the Spring semester prior to program start.  
✓ Will graduate from high school prior to the start of the SHP Summer Program.  
✓ U.S. citizen, permanent resident, or F1, J1 Visa Holders. | Invites receive a $6,000 stipend for their participation in the 10-week program. This compensation is meant to subsidize cost of living expenses for students and is considered income and subject to all applicable taxes and fees. All participants must secure their own housing and transportation for the duration of the program. In the case remote opportunities are only allowed, invitees will receive $15/hr for part-time work.  
**For more information**, visit the [website](#).

| Albert Einstein College of Medicine (New York) | The Einstein Summer Undergraduate Research Program (SURP) brings together 50 college students each summer for a one-of-a-kind opportunity to conduct original research in a laboratory at one of the world's top-ranking scientific institutions. The program is designed for undergraduates with a strong background in science who are considering a research career. | ✓ Currently enrolled undergraduate student of junior standing.  
✓ Strong background in the sciences (e.g., biology, biochemistry, chemistry, physics, bioengineering, chemical engineering, etc.).  
✓ U.S. citizen or permanent resident. | Students will receive a $3,000 stipend and free housing on campus. Transportation assistance (up to $500) is provided for students who live outside of New York City.  
For more information, visit the website. If you have additional questions, please send an email to the program. |
| American Society for Microbiology (District of Columbia) | The ASM Undergraduate Research Fellowship (URF) is designed for highly-competitive students who wish to pursue graduate careers (PhD or MD/PhD) in microbiology. Students will conduct a research project for a minimum of 10 weeks, work with faculty mentors who are ASM members and who are employed at the students’ home institution, and submit a research abstract for presentation at the yearly ASM General Meeting. | ✓ Currently enrolled, full-time matriculating undergraduate student at an accredited U.S. institution.  
✓ U.S. citizen, permanent resident, or DACA eligibility.  
✓ Access to an ASM member at their home institution to serve as a faculty mentor.  
✓ Not receiving other financial support for research during the fellowship. | Students will receive a stipend of up to $4,000; a one-year ASM student membership; and travel support to attend the ASM General Meeting.  
For more information, visit the website. If you have additional questions, please send an email to the program. |
| Amgen Scholars (California) | The Amgen Scholars Program at the California Institute of Technology introduces students to research under the guidance of a faculty mentor. This 10-week program is modeled on the grant-seeking process. Taking on the role of grant applicants, students collaborate with potential mentors to define and develop a project. Trainees will then write a research proposal for review by a faculty committee. Awards will be made on the basis of reviewer recommendations. | ✓ Currently enrolled undergraduate student of sophomore (with at least 4 quarters or 3 semesters of college course work), junior, or non-graduating senior standing attending a 4-year college or university.  
✓ Academic minimum: 3.2 GPA.  
✓ U.S. citizen or permanent resident, permanent residents, or have DACA status.  
✓ Interest in pursuing a PhD or MD/PhD. | Students will receive a $6,620 stipend, campus housing, and travel to and from Pasadena.  
For more information, visit the website. |

<td>Arizona State University (Arizona)</td>
<td>The <strong>Quantitative Research for the Life and Social Sciences Program (QRLSSP)</strong> is an intensive summer research experience that prepares undergraduate students for the rigors of graduate level research at the interface of mathematics, statistics, and the natural and social sciences. Select students are invited to Arizona State University for eight weeks, where their time is split between classroom instruction on research methods and hands-on research projects. ✓ U.S. Citizen or permanent resident. ✓ Undergraduates who have completed at least their sophomore year. ✓ Majoring in math, biology, or related fields with at least one year of calculus. ✓ African Americans, Latinos and Native Americans are strongly encouraged to apply.</td>
<td>Students will receive a $4,000 stipend, room &amp; board, and airfare &amp; transportation to ASU's Tempe campus (up to $500). <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the <a href="#">program</a>.</td>
<td></td>
</tr>
<tr>
<td>Association of American Medical Colleges (Multiple locations)</td>
<td>The <strong>AAMC</strong> serves and leads the academic medical community to improve the health of all. In 2004, a MD/PhD Section was established to promote the development, growth and nurturing of physician-scientist training programs by representing the interest of MD/PhD programs. The AAMC maintains a list of MD/PhD Summer Undergraduate Research Programs. ✓ Please refer to the program’s website or contact the respective administrator to review the eligibility criteria per program.</td>
<td><strong>For more information</strong>, visit the <a href="#">website</a>.</td>
<td></td>
</tr>
<tr>
<td>Augusta University (Georgia)</td>
<td>The <strong>Summer Student Training and Research Program (STAR)</strong> provides opportunities for students to develop skills as young scientists and to further explore their interest in biomedical research. During the 9-week program, STARs actively participate in a biomedical research project under the guidance of a Augusta University faculty member. Additionally, participants attend workshops, discussion groups, and laboratory demonstrations that expose them to a broad range of biomedical research techniques. ✓ 18 years or older by start of the session. ✓ Currently enrolled in an undergraduate degree program and completion of at least freshman year. ✓ Minimum overall GPA of 3.0. ✓ U.S. citizen or permanent resident.</td>
<td>Participants will be paid a salary of $4,500 (before taxes) for the 9-week period. Participants will be responsible for travel, meals, housing, and other personal expenses. On-campus housing is available. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the <a href="#">program</a>.</td>

<tr>
<td>Baylor College of Medicine (Texas)</td>
<td><strong>The Summer Medical and Research Training (SMART) Program</strong> allows students to become functioning members of Baylor laboratories and contribute to research efforts in more than 20 basic and clinical science departments. At the end of the program, students submit a short summary of their research. Daily seminars help students develop fundamental knowledge, introduce areas of biomedical research and emphasize the reciprocal relationship between basic research and clinical applications.</td>
<td>✓ Attending a university and returning to the college/university to complete their undergraduate degree. ✓ Academic minimum: 3.0 GPA</td>
<td>Students will receive a ~$5,000 stipend for 9 weeks. The stipend will most likely cover a mixture of salary, housing, and transportation depending on the funding source. For more information, visit the website. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Boston University (Massachusetts)</td>
<td><strong>The Summer Undergraduate Research Fellowship (SURF)</strong> is designed to promote access to graduate education among undergraduate students, especially those from groups traditionally underrepresented in the sciences who wish to pursue careers in biological research. The program offers 10 weeks of full-time research under the guidance of a BU faculty member.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Undergraduate student of junior or senior standing. ✓ Academic minimum: 3.0 GPA. ✓ Member of a group traditionally underrepresented in the sciences is highly encouraged to apply.</td>
<td>Students will receive a $5,500 stipend, $500-600 supply allowance, up to $500 in travel expenses, housing, and travel/lodging to the BU Undergraduate Research Symposium to present their research findings. For more information, visit the website. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Boston University (Massachusetts)</td>
<td><strong>The BRITE REU (Bioinformatics Research and Interdisciplinary Training Experience)</strong> at BU Bioinformatics focuses on computational and mathematical fundamentals of bioinformatics analysis through research projects in a broad range of topics. Each student is assigned a faculty mentor and a graduate student mentor. Training topics include programming workshops on Python, R, SQL, linux command line tools, git version control, machine learning, and data visualization; scientific communication skills, including creating a poster and presenting a talk; scientific ethics and responsible conduct of research; and applying to graduate school.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Rising juniors or seniors enrolled in a degree program (part-time or full-time) leading to a baccalaureate or associate degree. ✓ Applicants should have an interest in Biological research and some quantitative training in Computer Science, Mathematics, Physics, or a closely related field. *Women, minorities, students with disabilities, veterans, and those in schools with limited research opportunities are STRONGLY encouraged to apply.</td>
<td>Students will receive a weekly stipend of $600, apartment-style dorm on campus provided by BU Bioinformatics, and round trip airfare to Boston for out-of-state students. Additionally, all students receive travel funds to present a scientific poster at a BU-sponsored or national undergraduate research conference. For more information, visit the website.</td>

| Boston University School of Medicine (Massachusetts) | **The Summer Training as Research Scholars Program (STaRS)** provides scholars with the opportunity to participate in research and enhances skills required for successful entrance and completion of a graduate program or an MD/PhD program in the biomedical sciences. Each scholar is assigned a faculty mentor and participates in biomedical research projects in a broad range of topics, including heart, lung and blood research. In addition, the STaRS program includes journal clubs, research skill-building seminars and workshops, career discussions and workshops focused on special topics such as oral and written skills, resume and abstract writing, and applying to a PhD program or an MD/PhD program in the biomedical sciences. | ✓ U.S. citizen or permanent resident.  
✓ Rising junior or rising senior at the start of program at an accredited institution.  
✓ Minimum GPA of at least 3.0.  
*To support a diverse scientific workforce the BU STaRS program is particularly interested in the following groups: Racial/Ethnic Minorities (as defined by the NIH), which have a longstanding history of underrepresentation and continuing efforts, students with disabilities, and students from financially disadvantaged backgrounds. | Students will receive a stipend for program participation, round trip travel to Boston for out-of-state students, and University housing (apartment style dorms).  
**For more information**, visit the website.  
If you have additional questions, please send an email to the program. |
| Brandeis University (Massachusetts) | **The Research Experiences for Undergraduates (REU) program** in the Biological and Physical Sciences is a 10-week program for students to gain more research experience and to explore careers in the sciences. The two specialized programs are REU in Cell & Molecular Visualization and REU in Materials Research Science and Engineering Center (MRSEC). | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduate student.  
✓ For additional eligibility requirements, please check the program’s website. | Students will receive a stipend, housing, and meal allowance.  
**For more information**, visit the program’s website.  
If you have additional questions, please send an email to the program. |
| Brigham and Women’s Hospital (Massachusetts) | **The Summer Training in Academic Research and Scholarship (STARS)** program provides underrepresented minority (URM) students an opportunity to engage in research projects at Brigham and Women’s Hospital (BWH) and in conjunction with Harvard Medical School (HMS). This program is designed to enhance the research capabilities of URM students and to encourage these scholars to pursue advanced graduate education and training at BWH and HMS. | ✓ Member of a group traditionally underrepresented in the sciences.  
✓ U.S. citizen or non-citizen national with a permanent resident visa.  
✓ Undergraduate student of junior or senior standing OR first-year medical student.  
✓ Health insurance coverage. | Students will receive a $3,200 stipend for food and other necessities, travel compensation to and from Boston, and housing for the duration of the 8-week program.  
**For more information**, visit the website.  
If you have additional questions, please send an email to the program. |

| **Broad Institute of MIT and Harvard (Massachusetts)** | The Broad Summer Research Program (BSRP) is designed for underrepresented minority undergraduate students with an interest in the physical, biological, or computer sciences, engineering, or mathematics and a commitment to research. BSRP features a rich curriculum outside the lab that emphasizes communication, collaborative problem-solving, graduate school preparation, and demystifying scientific careers. | ✓ Enrolled in a four-year college for the fall.  
✓ Academic minimum: 3.2 GPA.  
✓ U.S. citizen or permanent resident.  
✓ Member of a group traditionally underrepresented in the sciences is highly encouraged to apply. | Students will receive a $4,860 stipend with paid housing and travel expenses.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| **California Institute of Technology (California)** | The WAVE Fellows program is a summer research opportunity in which participants can increase their lab research skills by working on a project with a mentor at CalTech. In addition to the research project, interns will attend weekly seminars, academic development workshops, and other social/cultural activities. | ✓ Be current sophomores, juniors, or non-graduating seniors.  
✓ Prior research experience.  
✓ Academic minimum: 3.2 GPA.  
✓ Interest in pursuing a PhD.  
✓ US citizen or permanent resident. | Students will receive a $6,620 stipend for 10-weeks with a $2,000 housing and travel supplement provided.  
**For more information**, visit the [website](#). |
| **California Institute of Technology (California)** | The Summer Undergraduate Research Fellowships (SURF) program at CalTech gives students the opportunity to conduct research under the guidance of experienced mentors working at the frontier of their fields. To enrich the research experience, SURF Fellows are invited to attend the following: Weekly seminars by Caltech faculty & JPL scientists and engineers; an academic and professional development series on developing a research career, graduate school admissions, and other topics of interest to future researchers; various social and cultural activities; weekly small student-faculty dinners; and special field trips. | ✓ U.S. citizen or permanent resident  
✓ Minimum GPA of at least 2.0  
✓ Not be under any academic or disciplinary sanction.  
✓ Completion of the second semester or third quarter at your college or university. | Fellows will receive a $6,620 award for the ten-week period.

<td>Children's Hospital of Philadelphia Research Institute (Pennsylvania)</td>
<td>The Center for Injury Research and Prevention (CIRP) hosts the Injury Science Research Experiences for Undergraduates (REU) program, a 10-week paid summer research internship opportunity for undergraduate students. CIRP is a leading multidisciplinary center engaged in collaborative cross-discipline research implementing real-world applications. During this program, students will work on a focused research project with an assigned CIRP mentor, receiving formal training on presenting research, ethics and technical writing. Students will also attend formal workshops, meetings, field trips, and seminars, and will have a unique opportunity to apply for a grant for student-initiated research for the trainee to continue at his/her home institution.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Minimum GPA of 3.0. ✓ One year completed college by program start date. ✓ Anticipated graduation after program end date. * Priority will be given to women, persons with disabilities, racially and ethnically marginalized communities (American Indians/Alaskan Natives, Blacks/African Americans, and Latinos), and students from colleges and universities where STEM research opportunities are limited, including two-year colleges.</td>
<td>Each student will be paid a stipend of $5,000 and will receive free housing for the 10-week program. All students will be able to request up to $500 in reimbursement for travel to and from Philadelphia for the program or to a conference to present their research. <strong>For more information,</strong> visit the website. If you have additional questions, please send an email the program.</td>
</tr>
<tr>
<td>Cincinnati Children's Hospital Medical Center (Ohio)</td>
<td>The Summer Undergraduate Research Fellowship (SURF) provides an opportunity for students to explore clinical, translational, and basic science research in laboratories in the Department of Pediatrics, University of Cincinnati College of Medicine. The primary goal is to provide students with a foundation for making career choices in the biomedical sciences.</td>
<td>✓ Undergraduate student of freshmen, sophomore, junior or senior standing in the Fall are eligible. ✓ Academic minimum: 3.0 GPA. ✓ U.S. citizen or permanent resident. ✓ Must have an interest in pursuing a career in biomedical research or medicine.</td>
<td>Students will be paid an hourly rate of $10.10 which will be approximately $4000 (before taxes) for the summer. UC Housing is available to interns at an out-of-pocket cost of $1,750 for the 10-week program. <strong>For more information,</strong> visit the website. If you have additional questions, please send an email to Sherry Thornton.</td>
</tr>
<tr>
<td>City of Hope (California)</td>
<td>The Eugene and Ruth Roberts Summer Student Academy offers students an opportunity to spend 10 weeks at the City of Hope as a member of a biomedical research team. This experience is designed to promote the development of critical thinking and scientific communication skills.</td>
<td>✓ Possess a strong interest in learning more about biomedical research. ✓ At least 16 years of age and registered at an accredited high school, college, or university. ✓ Completion of high school courses in chemistry and biology. ✓ U.S. citizen or permanent resident.</td>
<td>Students will receive a $4,000 stipend. <strong>For more information,</strong> visit the website. If you have additional questions, please send an email to the program.</td>

<tr>
<td>Cold Spring Harbor Laboratory (New York)</td>
<td>The 10-week <strong>Undergraduate Research Program</strong> (URP) at CSHL provides an opportunity for undergraduate scientists from around the world to conduct first-rate research. Students learn the scientific process, technical methods and theoretical principles, and communicate their discoveries to other scientists. In addition to doing research in the lab, URP participants attend a series of specially designed workshops, seminars and collegial events.</td>
<td>✓ Currently enrolled undergraduate student of sophomore or junior standing with a strong academic background in a science. * Exceptions are made for first-year undergraduate students with prior independent research experience.</td>
<td>Students will receive a $6,000 stipend, in addition to room and board at the Cold Spring Harbor Laboratory campus. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Colorado State University (Colorado)</td>
<td>The <strong>Research Experience for Undergraduates (REU)</strong> will provide students an introduction to a variety of aspects of chemical research. In addition, students will participate in activities that will enrich their presentation, ethics and career skills. The main focus of this 10-week summer program is the research that each undergraduate student performs under the guidance of a faculty mentor. Undergraduate student participants work in the faculty mentor’s laboratory and participate fully in the research group activities.</td>
<td>✓ Completion of at least some biology and general chemistry courses. ✓ U.S. citizen or permanent resident. ✓ Cannot be graduating in the spring. ✓ Underrepresented ethnic and racial minorities, those with physical challenges, and students from smaller undergraduate institutions with limited research opportunities are especially encouraged to apply.</td>
<td>Students will receive a $5,000 stipend, housing in an on campus dormitory, and up to $600 for travel expenses. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program coordinator, Julie Mintle or call: (970) 491-5409.</td>

</table>
| Columbia University Medical Center (New York) | **The Summer Program for Underrepresented Students** provides an intense research fellowship designed to provide meaningful training in biomedical research and enhance students’ ability to achieve a career in biomedical research and/or medicine by pursuing an advanced degree. In addition, students receive in-depth training in biomedical research methodology, including the: experimental design and analysis; critical reading of scientific literature through journal clubs; presentation of scientific results at lab meetings; attendance at convened poster sessions, abstract and manuscript writing; and career counseling and research ethics. | ✓ U.S. citizen or permanent resident.  
✓ Preference is given to students who are rising juniors or seniors.  
✓ Academic minimum: 3.2 GPA.  
✓ Underrepresented minority student and/or students from economically or educationally disadvantaged backgrounds.  
✓ Interested in pursuing graduate education in a biomedical field (MD, MD/PhD, or PhD). | Students will receive a $4,000 stipend.  
**For more information**, visit the website.  
If you have additional questions, please send an email to the program. |
| Columbia University Medical Center (New York) | **The Summer Public Health Scholars Program's (SPHSP)** goal is to increase interest in and knowledge of public health and biomedical science careers. This is a rigorous program which includes Public Health coursework at Columbia University; hands-on field experience and immersion in a diverse, economically disadvantaged urban environment; seminars and lectures with public health leaders; and mentoring by faculty members, ensuring students’ exposure to the breadth and importance of public health as a career option. | ✓ U.S. Citizen, permanent resident, or U.S. national.  
✓ Rising juniors and seniors, OR Recent college graduates.  
✓ Minimum GPA of 2.7.  
* African American, Hispanic/Latino, Asian American, American Indian/Alaskan Native, Native Hawaiian, Pacific Islander, people with disabilities, economically disadvantaged, and LGBTQ individuals are encouraged to apply. | A stipend for participation is provided to all program scholars. Each scholar is provided financial support for round-trip travel. Housing is provided to all students on the Columbia University Morningside Campus.  
**For more information**, visit the website.  
If you have additional questions, please send an email to the program. |
| Committee on Institutional Cooperation (Michigan) | **The Summer Research Opportunities Program (SROP) at Michigan State University** aims to involve undergraduate students in graduate-level research, provide a mentoring experience with an MSU faculty member, motivate undergraduate students to pursue an academic career, and recruit undergraduate students for graduate study at MSU. Supporting activities include weekly research reports, seminars, graduate enrichment workshops, involvement with the MSU community and research methods enrichment workshops. | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduate student of non-graduating standing with at least one semester or undergraduate education remaining after completing program.  
✓ Academic minimum: 3.0 GPA.  
✓ Demonstrated interest in pursuing a graduate degree. | Students will receive a $4,000 stipend, travel to and from MSU, room and board on the MSU campus, and opportunities to present their research findings.  
**For more information**, visit the MSU website OR the CIC website.  
If you have additional questions, please send an email to the program. |

| Committee on Institutional Cooperation (Michigan) | **The Summer Research Opportunities Program (SROP)** at the **University of Michigan** offers outstanding undergraduate students who are traditionally underrepresented in their field of study an opportunity to conduct intensive research across a variety of disciplines. The goal is to prepare students for a PhD program at UM. Students will work with faculty mentors and engage in a series of academic, professional, and personal development seminars. | ✓ U.S. citizen or permanent resident, or non-U.S. citizens with DACA.  
✓ Undergraduate student of junior or senior standing.  
✓ Academic minimum: 3.0 GPA.  
✓ A low-income individual who is a first-generation college student OR a member of a group that is underrepresented in graduate education OR have experienced financial hardship as a result of family economic circumstances. | Students will receive a $4,500 stipend and travel reimbursement, on-campus housing, and partial meal reimbursement.  
**For more information**, visit the UM website OR the CIC website.  
If you have additional questions, please send an email to the program. |
| Committee on Institutional Cooperation (Pennsylvania) | **Pennsylvania State University** hosts the **Summer Research Opportunities Program (SROP)**, an eight-week research program designed to interest talented undergraduate students from underrepresented groups in academic careers and to enhance their preparation for graduate study through intensive research experiences with faculty mentors. In addition to the research experience, the program includes professional development workshops, seminars, field trips, and social activities. | ✓ A low-income individual who is a first-generation college student OR a member of a group that is underrepresented in graduate education OR have experienced financial hardship as a result of family economic circumstances.  
✓ U.S. citizen or permanent resident.  
✓ Undergraduate student of junior or senior standing with strong interest in pursuing a PhD following completion of bachelor’s degree. | **For more information**, visit the Penn State website OR the CIC website. |

<tr>
<td>Congressional Hispanic Caucus Institute (Washington D.C)</td>
<td>During the Congressional Hispanic Caucus Institute (CHCI) paid summer and semester internships Hispanic/Latinx undergraduate students experience what it's like to work in a congressional office, while participating in weekly professional and leadership development and civic engagement through community service. CHCI Congressional Interns learn firsthand how the legislative system works, spending four days each week working on Capitol Hill. Usually, interns are placed with a member of congress who serves a district in their home state performing meaningful work: responding to constituent inquiries; writing policy briefs; conducting legislative research on issues; and attending congressional hearings and policy briefings.</td>
<td>✓ High academic achievement (preference of 3.0 GPA or higher).  ✓ Evidence of leadership skills and potential for leadership growth.  ✓ Demonstrated commitment to public service-oriented activities.  ✓ Students must currently be enrolled full time and working towards their undergraduate degree in the academic period prior to participation and have not had their degree conferred before completion of the program.  ✓ U.S. citizen or permanent resident.</td>
<td>CHCI interns will receive $3,750 (Fall/Spring, 12 weeks), $3,125 (Summer, 10 weeks) for participating. Round-trip transportation to Washington, DC is provided and all housing expenses are covered by the program.  <strong>For more information, visit the website.</strong></td>
</tr>
<tr>
<td>Dartmouth College Geisel School of Medicine (New Hampshire)</td>
<td>The Dartmouth MD-PhD Undergraduate Summer (MPUS) Fellowship Program is an 8 week fellowship aimed at exposing Fellows to basic medical science research by conducting cutting edge research alongside MD-PhD students presently in the PhD portion of their training. In addition, Fellows will have the opportunity to examine the clinical aspect of medicine during weekly rounds with one of Dartmouth’s illustrious clinical faculty at the Dartmouth Hitchcock Medical Center (DHMC). Finally, Fellows will be exposed to the wonderful community of MD-PhD students at Dartmouth and get to better understand the role of, and opportunities available to, the physician-scientist in training.</td>
<td>✓ Minimum GPA of 3.3.  ✓ Applicant must be a sophomore or junior at time of application.  ✓ U.S. citizen or permanent resident.  ✓ Students affiliated with funded summer undergraduate research organizations for underrepresented ethnic minority students (i.e. MARC, U-Star, McNair, LSAMP) are especially encouraged to apply.</td>
<td>Fellows will receive a stipend of $1,000, dormitory housing on the Dartmouth campus, a complimentary meal plan with access to all of the Dartmouth cafeterias, and reimbursement for reasonable travel-related expenses, up to $500.  <strong>For more information, visit the website.</strong>  If you have additional questions, please send an email to the program.</td>

| Drexel University College of Medicine (Pennsylvania) | During the Summer Undergraduate Research Fellowship (SURF), Drexel University College of Medicine faculty and members of their laboratories guide students through the planning and practice of daily research experiments and activities. Each student is assigned to work in a specific laboratory for the duration of the program, typically on a project unique to the research goals of that laboratory. Students are integrated into the daily work of the laboratory, participating in laboratory meetings and gaining exposure to different facets of the laboratory’s research. | ✓ Interest in pursuing biomedical research as a career and in good academic standing.  
✓ Currently enrolled undergraduate student of sophomore or junior standing are given priority, although freshmen may apply. | SURF students will receive a $3,000 stipend. A limited number of accepted students will be provided housing.  
**For more information**, visit the [website](#).  
If you have additional questions, please contact Tsz Kwok at: (215) 571-4526. |
| Duke University (North Carolina)                    | The Duke University Summer Research Opportunity Program (SROP) is a 10-week training program designed to give motivated undergraduate students hands-on experience in graduate-level biomedical research. Students spend a majority of their time learning research techniques in the laboratory, attending lab meetings, interacting with members of other labs, and otherwise conducting themselves just as if they were in graduate school. Each student is mentored by a faculty mentor, solving real research problems in an active, modern biomedical research laboratory. | ✓ Undergraduate student considering PhD in biological sciences or biomedical sciences. | Students will receive a competitive stipend, on-campus housing, and travel assistance.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| Fred Hutchinson Cancer Research Center (Washington) | The Summer Undergraduate Research Program (SURP) is an intensive, 9-week internship designed to provide research experience and mentorship for undergraduate students who are interested in biological research. In addition to completing a mentored research project, students will attend weekly research seminars regarding a broad array of scientific topics. Students will also participate in professional development workshops designed to facilitate the preparation of competitive graduate/medical school applications. The program culminates with a competitive poster session. | ✓ U.S. citizen or permanent resident.  
✓ Entering the summer BEFORE the final year (or quarter or semester) of undergraduate studies.  
✓ Strong background in the sciences. | Students will receive a $4,938 stipend and travel costs (up to $450). Interns are responsible for their own housing and meals.  
*Note:* The Fred Hutch negotiates a housing option for out-of-town students at the University of Washington, which is available for approximately $2,200.

</table>
| Georgetown School of Medicine (Washington, D.C.) | The Dean for Medical Education's Academy for Research, Clinical, and Health Equity Scholarship (ARCHES) is a six-week program for ten undergraduate students who are interested in pursuing medical studies. This program will engage selected participants in clinical experience, guided research, and immersive community based learning. Participants will gain exposure to the clinical and research activities at Georgetown University School of Medicine and to the greater DC community on issues of health equity. ARCHES aims to strengthen the research and clinical skills of promising undergraduate students and prepare them for successful matriculation into medical school. | ✓ U.S. citizen, a permanent resident, DACA recipient or international student holding an F1 or J1 visa.  
✓ The program is open to rising juniors and rising seniors enrolled in a four-year college or university.  
✓ Academic minimum: 2.5 GPA.  
✓ First-generation college students, students from backgrounds underrepresented in medicine, and students committed to advancing opportunities for communities and populations who lack equitable access to health care are encouraged to apply. | Students will receive a $4,000 stipend and housing accommodations. Up to $250 per student on a case-by-case basis by the Georgetown Office of Diversity & Inclusion for travel expenses. Students are responsible for their own meals/food cost (except for program event meals provided by ARCHES).  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to Susan Cheng. |
| Gerstner Sloan-Kettering (New York) | The Summer Undergraduate Research Program is designed for outstanding undergraduate students who are interested in pursuing a career in biomedically related sciences. Students in the program will have the opportunity to obtain hands-on research experience in cutting-edge laboratories, attend skills development workshops and weekly seminar presentations by faculty, postdoctoral fellows, and graduate students from all eight research programs at Memorial Sloan Kettering Cancer Center. | ✓ Currently enrolled undergraduate students of freshmen, sophomore or junior standing.  
✓ Completion of college-level general biology and/or introductory chemistry courses, and some advanced science courses.  
✓ Academic minimum: 3.0 GPA.  
✓ Must have prior research experience. | Students will receive a $6,000 stipend and housing accommodations.

<td>Harborview Medical Center (Washington)</td>
<td>Harborview Injury Prevention &amp; Research Center’s (HIPRC) Pediatric Injury Prevention Student Internship Training (INSIGHT) program is an intensive, eight-week summer internship that provides paid research experience and mentorship for students who are interested in injury research. Participants are matched to research projects and partnered with health sciences faculty from across the University of Washington and work alongside peers and health professionals from an array of disciplines.</td>
<td>✓ U.S citizen or permanent resident and are eligible to work in the U.S or hold a valid student visa or have DACA status. ✓ Minimum cumulative GPA of 3.0 is preferred. ✓ Preference is given to students who will graduate in Spring 2022, or who will be juniors and seniors in Fall 2021.</td>
<td>Interns will receive a $3,200 stipend. Students are independently responsible for arranging their housing, meals and transportation. The UW offers some discounted summer housing within the dorms on campus. Travel reimbursement awards are available for individuals who qualify. For more information, visit the website. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Hartford Hospital (Connecticut)</td>
<td>The Summer Student Pre-Med and Research Program offers pre-med students a ten-week introduction to research methodology, patient treatment, and ethical issues in medicine as well as exposure to a broad spectrum of health care providers within a large community teaching hospital. Students selected for the Program engage in an assigned clinically-related investigative project within a department division. At the conclusion of the ten-week period, each student will complete a poster presentation summary of the investigation.</td>
<td>✓ Applicants home residency must be from the Northeast region only (NY, CT, RI, MA, NH, VT, and Maine). ✓ Pre-medical college student completing their junior year by May 2021. ✓ Minimum GPA of 3.3.</td>
<td>Students will receive a $4,000 stipend for the 10 weeks as well as on campus housing and parking, as needed. For more information, visit the website. If you have additional questions, please send an email to the Program Director, Rosemarie Portal.</td>
</tr>
<tr>
<td>Harvard Affiliated Trauma Centers (Massachusetts)</td>
<td>The Harvard Orthopedic Trauma Undergraduate Summer Internship is a pan-campus orthopaedic trauma service with sites at four Harvard-affiliated Level I Trauma Centers. The main aim of the internship is to provide interns with a basic understanding about clinical research, primarily through providing practical experience. The secondary aim is to provide opportunities for interns to shadow in the clinical environments in order to see what life is like in the hospital setting.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Full-time sophomore, junior, or senior at an accredited institution. ✓ Are interested in clinical research and/or considering careers in Medicine or Healthcare.</td>
<td>Students will not receive a stipend or housing. Food and snacks will be provided by the program while at the hospital. For more information, visit the website. If you have additional questions, please send an email to Abigail Sagona.</td>

| Harvard Medical School (Massachusetts) | **The Four Directions Summer Research Program (FDSRP)** is an 8-week research experience that provides an opportunity for undergraduates to explore careers in the medical profession under the guidance and supervision of staff from Harvard Medical School and Brigham and Women's Hospital. The program prepares students through mentoring, networking, and hands on research experience. The program encourages all interested students to apply to this program but requires a demonstrated interest and commitment to Native American communities. | ✓ U.S. citizen, U.S. national, or permanent resident.  
✓ Minimum 1 year of undergraduate studies in a 4-year undergraduate degree program prior to start of program (June).  
✓ Demonstrated interest in careers in medicine, public health, or biomedical sciences. | Students will receive a $3,200 stipend, free housing, and round-trip travel covered by the program.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Harvard School of Public Health (Massachusetts) | **The Summer Internships in Biological Sciences in Public Health** Program provides interested students with an 8-week laboratory-based biological research opportunity. Students will conduct an independent research project under the guidance of a Harvard faculty member to focus on biological science questions that are important to disease prevention. Disease areas include infections, cancer, lung diseases, common diseases of aging, diabetes, obesity, etc. Scientific approaches include regulation of cell growth and gene regulation, cellular metabolism, DNA modification, cellular signaling, structure-function analyses, etc. | ✓ U.S. citizen, U.S. national, or permanent resident.  
✓ Member of an underrepresented group in graduate research OR a first-generation college student OR from an economically disadvantaged background.  
✓ Academic minimum: 3.0 GPA.  
✓ Demonstrated interest in public health, specifically laboratory research. | Students will receive a $3,600 stipend, a travel allowance (up to $500), and housing.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Harvard School of Public Health (Massachusetts) | **The Summer Program in Biostatistics & Computational Biology** is an intensive 6-week program, where students will learn about biostatistics and epidemiology fundamentals, including statistical software packages. In addition to exploring these fields, they will also participate in a collaborative research project with Public Health faculty. | ✓ U.S. citizen or permanent resident.  
✓ Member of a group that is traditionally underrepresented in graduate education OR a first-generation college student OR a low-income student OR a disabled student  
✓ Interest in pursuing graduate studies in biostatistics or epidemiology. | Travel to Boston and living stipend (including lodging and some meals) are provided.

| Harvard School of Public Health (Massachusetts) | The **Summer Program in Epidemiology** introduces the use of mathematics and quantitative methods in public health areas such as cancer prevention, infectious disease, neuro-psychiatric, and pharmacoepidemiology. This 4-week program includes introductory coursework in epidemiology and biostatistics, attending formal lectures by Harvard faculty members, and conducting a group research project on a public health topic. | ✓ U.S. citizen, U.S. national or permanent resident.  
✓ Member of an underrepresented group in biomedical research OR has a disability OR from an economically disadvantaged background.  
✓ Academic minimum: 3.0 GPA.  
✓ Demonstrate an interest in public health and is interested in pursuing a graduate degree in public health. | Students will receive a stipend, travel support, and housing.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Harvard School of Public Health (Massachusetts) | The **Multidisciplinary International Research Training Program (MIRT)** is a national program developed to encourage underrepresented students to pursue biomedical and behavioral science research careers. Providing support for students to conduct research overseas, students will spend 8-12 weeks at a foreign research site. | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled student at least of junior standing in a full-time degree program at the start of the program.  
✓ Strong interest to participate in international health research work. | Students will receive a monthly stipend, foreign living expenses, roundtrip airfare to foreign institution, and health insurance.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Harvard Stem Cell Institute (Massachusetts) | The goal of the **Harvard Stem Cell Institute (HSCI) program** is to provide undergraduate students with a focused and challenging summer research experience in a cutting-edge stem cell science laboratory. Interns are exposed to different professional options within the scientific arena through a stem cell seminar series, a career pathways presentation, and a weekly stem cell companion course. | ✓ Undergraduate enrolled at colleges and universities across the U.S. and internationally.  
✓ Must not have graduated before the start of the program.  
✓ Some background in biological science. Previous research lab experience is highly desirable. | Students will receive a $4,500 stipend for participation in the 10-week program. On-campus housing may be available, at cost, to participants.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Harvard University (Massachusetts) | The **Systems Biology Internship Program** is a 10-week opportunity for students to work in research labs and to explore this field. Interns will participate in a research project that will be presented at the end of the program, receive mentorship from current faculty, and partake in group meetings, seminars, and field trips in the Boston area. | ✓ Currently enrolled undergraduate student who is 18 years or older by start of program.  
✓ U.S. citizen or permanent resident. | Students will receive a $5,000 stipend, housing, and access to the Harvard athletic facilities.  
**For more information**, visit the [website](#).

| Harvard University (Massachusetts)                   | **Summer Honors Undergraduate Research Program (SHURP)** is a ten-week summer research program primarily for college students belonging to groups that are under-represented in the sciences. Participants will conduct 10 weeks of paid, scholarly research under the guidance of a faculty or research mentor, attend professional development workshops and research discussions, and present their work at the Leadership Alliance National Symposium. | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduates who will not have completed their degree by June 2022.  
✓ Minimum GPA of 3.0.  
✓ Have already had at least one summer (or equivalent term-time) of experience in a research laboratory. | While the majority of participants receive a supplement from SHURP, circumstances can vary. The typical stipend amount is $450/week for 10 weeks. Housing and travel to and from Boston will be supported by the program.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Health Career Connection (Multiple locations)        | The **Health Career Connection (HCC)** places talented, diverse students in summer internships that provide them with invaluable exposure, experience, and mentoring to pursue health careers. The program is 10-weeks and full-time including workshops on key professional and personal development topics, visits to diverse health settings, mentoring from the HCC team; connections to top graduate schools, and support from HCC’s network. | ✓ All students are eligible. Students of color and those from disadvantaged backgrounds are strongly encouraged to apply. | A stipend ranging from $3,000 - $4,000 is offered.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Herman B. Wells Center for Pediatric Research (Indiana) | The **Pediatric Research Summer Student Internship** is an eight-week program that offers participants the opportunity to engage in expert research. This is an excellent opportunity for undergraduate and graduate students to gain hands-on experience in biomedical sciences. The program’s long-term goal is to increase the number of those choosing a career in pediatric health research. | ✓ *Currently enrolled undergraduate OR graduate student in a science major.  
✓ Must be able to commit to participating in the entire 10-week program.  
*Note: Must be 18 years of age to apply. | Interns are given a $3,500 stipend for the 8-week program. Interns are responsible for their own housing and transportation arrangements.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Hispanic Association of Colleges and Universities (Multiple Locations) | The Hispanic Association of Colleges and Universities **National Internship Program (HNIP)** partners with some of the leading corporations in the nation to assist them in attracting and hiring the best talent from HACU member colleges and universities. The process is very competitive but rewarding, as many internships lead to full-time roles. Opportunities for both internships and full-time employment are available. | ✓ Minimum 3.0 GPA.  
✓ Enrollment in a degree-seeking program at an accredited institution.  
✓ Authorization or eligibility to work in the United States by law. | Round-trip airfare to/from internship location is provided for non-local students. Assistance to locate and secure housing during the internship for non-local students is provided, however the intern is responsible for paying for their housing arrangements.  
**For more information**, visit the [website](#). |

<td>Hormel Institute (Minnesota)</td>
<td><strong>The Hormel Institute offers a Summer Undergraduate Research Experience (SURE) Program</strong> for students to gain knowledge of basic research and to provide a unique laboratory experience for students interested in the sciences. Students work on research projects to expand their knowledge of basic research as well as learn about equipment and techniques that generally are not available in undergraduate academic programs.</td>
<td>✓ Currently enrolled undergraduate student of junior or senior standing. <em>Freshmen and sophomores are also welcome to apply.</em> &lt;br&gt;✓ Interested in pursuing careers in biology or medically-related fields.</td>
<td><strong>For more information</strong>, visit the <a href="http://example.com">website</a>. &lt;br&gt; If you have additional questions, please send an email to Brenna Gerhart.</td>
</tr>
<tr>
<td>Indiana University, Melvin and Bren Simons Cancer Center (Indiana)</td>
<td><strong>The Indiana University Simon Cancer Center Summer Research Program (SRP)</strong> is offered to students from underrepresented population groups who are pursuing careers in biomedical and behavioral sciences. Students will gain exposure to a wide range of basic science, translational and clinical research activities and continually interact with and learn from other students, clinical and post-doctoral fellows, and faculty. Interns will also attend weekly workshops that deal with issues related to gaining admission to graduate and professional programs of study.</td>
<td>✓ Completed at least 24 hours of college credit. &lt;br&gt;✓ Major in biomedical or behavioral science. &lt;br&gt;✓ Academic minimum: 3.2 GPA.</td>
<td>Students will receive a stipend for participation in the SRP. Participants are responsible for their own housing and transportation arrangements. <strong>For more information</strong>, visit the <a href="http://example.com">website</a>. &lt;br&gt; If you have additional questions, please email the program coordinator, Elmer Sanders.</td>
</tr>
<tr>
<td>Iowa State University (Iowa)</td>
<td><strong>The George Washington Carver Summer Research Internship Program</strong> promotes “science with practice” by exposing interns to research opportunities under the direction of College of Agriculture and Life Sciences (CALS) research faculty members. The internship program further seeks to bridge the gap between lack of access to technology/information and opportunities to engage in experiential learning in an effort to increase the participation of students of color in STEM fields. In addition to their research experience, interns participate in weekly educational seminars, and social and cultural activities.</td>
<td>✓ Academic minimum: 3.0 GPA. &lt;br&gt;✓ U.S. citizen or permanent resident. &lt;br&gt;✓ Note graduating seniors are eligible to apply.</td>
<td>Students are provided room and board on campus, round-trip airfare, a meal plan, and a $3,000 stipend. <strong>For more information</strong>, visit the <a href="http://example.com">website</a>. &lt;br&gt; If you have additional questions, please send an email to Dr. Theressa Cooper.</td>

<tr>
<td>Iowa State University (Iowa)</td>
<td>The Department of Chemical and Biological Engineering hosts the <strong>Biological Materials and Processes Experience for Undergraduates (BioMaP REU)</strong> a program that creates novel research experiences for undergrad students from around the country in the areas of biological materials and processes. Students are active members of interdisciplinary groups and interact with faculty, post-doctoral researchers, graduate students and industry. Students may also participate in cohort experiences such as joint seminars and meetings.</td>
<td>✓ U.S. citizen or permanent resident.</td>
<td>Students will receive a stipend of $500/week. Up to $800 in travel expenses will be covered by the program as well as up to $2,500 allowance for food and housing. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Janelia Research Campus (Virginia)</td>
<td>The <strong>Janelia Undergraduate Scholars program</strong> gives undergraduates an opportunity to spend 10 weeks during the summer doing research as an intern in the lab of a mentor at the Janelia Research Campus. The scholars are encouraged to attend weekly seminars and other events at Janelia. At the end of the session, each scholar will present his or her work at a symposium.</td>
<td>✓ Current undergraduate students OR post-baccalaureate students who have not yet committed to a PhD program. ✓ Must have at least one independent research experience.</td>
<td>Students will receive a $5,000 stipend. On-site housing, food, and travel expenses are covered by the program. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program director, <a href="#">Erik Snapp</a>.</td>
</tr>
<tr>
<td>Johns Hopkins University Medical Institutions (Maryland)</td>
<td>The <strong>Summer Internship Program (SIP) at The Johns Hopkins Medical Institutions</strong> offers a unique opportunity to work for the summer in a research laboratory at one of the world's top-ranking scientific institutions. The purpose of the program is to give students, who are interested in pursuing careers in the biomedical sciences, the opportunity to conduct research while exposed to the excitement of an academic medical environment at a major research center. Research opportunities are available in the following areas: Basic Science Institute, BSI Chemistry-Biology Interface, BSI- Summer Research Internships in Immunology, Bloomberg School of Public Health, and Pulmonary and Critical Care Medicine.</td>
<td>✓ There are 11 distinct research opportunities available under the SIP umbrella. Each division of the Summer Internship Program is administered separately. See each division's eligibility requirements on the <a href="#">website</a> for more information.</td>
<td>Students will receive a $3,000 stipend and on-campus housing. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program.</td>

| **Kansas State University** (Kansas) | The Summer Undergraduate Opportunity Program (SUROP) at KSU is designed to help undergraduate students, especially those from underrepresented groups, prepare for graduate school and other advanced fields of study. Students will spend 9 weeks gaining research experience under the guidance of faculty mentors. Students will also attend weekly seminars that cover key components of the research experience, applying to graduate school, and the graduate school experience. | ✓ U.S. citizen or permanent resident.  
✓ Academic minimum: 3.0 GPA.  
✓ Currently enrolled undergraduate student of at least sophomore standing.  
✓ Preference will be given to non-KSU students. | Students will receive a $4,500 stipend, in addition to travel support (up to $300) and residence hall room and board.  
**For more information**, visit the website.  
If you have additional questions, please send an email to the program. |
| **The Leadership Alliance** (Multiple Locations) | The Leadership Alliance is a national consortium of 20 leading research and teaching colleges and universities. The mission of the Alliance is to develop underrepresented students into outstanding leaders and role models in academia, business and the public sector. The Summer Research - Early Identification Program (SR-EIP) is a fully paid summer internship that provides undergraduates with training and mentoring in the principles underlying the conduct of research and prepares them to pursue competitive applications to PhD or MD-PhD programs. | ✓ U.S. citizen or non-citizen national, or permanent resident.  
✓ Minimum GPA of 3.0.  
✓ Demonstrate a committed interest to pursue graduate study toward a PhD or MD-PhD.  
✓ Completed at least two semesters and have at least one semester remaining of their undergraduate education by the start of the summer program. | For a list of participating institutions and their benefits, visit the website. |
| **Lillehei Heart Institute** (Minnesota) | The Lillehei Heart Institute offers their Summer Research Scholars Program for students with the opportunity to learn about cardiovascular science and medicine. Working in a lab with a faculty mentor, participants will be exposed to clinical, industrial, and academic medicine. Students will also be able to tour the Visible Heart Lab in addition to participating in a guided heart dissection. | ✓ Enrolled in an accredited degree program in a healthcare-related field. | Students will receive a $15/hr stipend.  
Scholars are responsible for housing and meals.  
**For more information**, visit the website.  
If you have additional questions, please send an email to the program. |

<td>Loyola University Chicago (Illinois)</td>
<td>The Summer Undergraduate Research Program in Pharmacology and Therapeutics offers 10 weeks of intensive, practical laboratory research experience that is designed to provide an opportunity for students to gain valuable biomedical research experience in pharmacology. Awardees will attend seminars by guest speakers, weekly discussions on basic concepts in pharmacology and professional development for the research scientists led by our faculty. They will also attend a career panel and have an opportunity to tour a pharmaceutical facility. At the end of the fellowship each student will provide an oral presentation of their work to students, faculty and staff of the Department. ✓ US citizen or permanent resident. ✓ Enrolled as a rising Junior or Senior in a baccalaureate program or equivalent in the Fall 2022 term. $5,200 will be provided by the Department of Molecular Pharmacology and Neuroscience for room, board or travel allowance as the student chooses. Fellows must secure their own housing for the duration of the program. For more information, visit the website. If you have additional questions, please send an email to Dr. Karie Scrogin.</td>
<td></td>
<td></td>

<tr>
<td>Maine Medical Center Research Institute (Maine)</td>
<td>The Maine Medical Center Research Institute's Summer Student Research Program (SSRP) offers pre-college and undergraduate students an opportunity to engage in biomedical science research in a broad range of areas, including: Vascular Biology, Stem Cell Biology, Developmental Biology, Neurobiology, Hematology, Nephrology, Tumor Biology, and Molecular Genetics. ✓ High school (completion of grade 12) OR currently enrolled, full-time undergraduate student. ✓ Academic minimum: 3.0 GPA ✓ Can be employed in the U.S. Students will receive $12.50 per hour. Students are responsible for their own transportation and housing. For more information, visit the website. If you have additional questions, please send an email to the program.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Massachusetts General Hospital (Massachusetts)</td>
<td>The goal of the Summer Research Trainee Program (SRTP) is to build a pipeline of under-represented in medicine, college and medical school students who are interested in academic biomedical research careers. The SRTP will pair students with a Mass General Hospital investigator in this 8-week program. Preceptors will provide guidance and instruction in techniques necessary to address current problems in science and medicine. ✓ U.S. citizen or permanent resident. ✓ Undergraduate junior or senior OR post-baccalaureate student OR graduate student OR rising 1st year medical student OR first-year medical student. ✓ Member of an underrepresented minority group. Student will receive a $5,000 stipend, along with housing (lodging arrangements provided near the hospital). For more information, visit the website. If you have additional questions, please send an email to the program.</td>

</table>
| Massachusetts Institute of Technology (Massachusetts) | **The MIT summer research program in the fields of Biological Science (MSRP Bio)** is a 10-week research training program for highly motivated undergraduate sophomores and juniors who are ready for an intensive research experience at a top-notch research institution which offers cutting edge technology and multidisciplinary approach to modern biological research. Students will conduct research under the direct supervision of a research mentor in a field of their interest. Students will learn a range of skills, both technical and intellectual, that will help them develop into successful independent scientists. | ✓ Enrolled full-time undergraduate at a university or four-year college in the U.S.  
✓ Be a sophomore, junior, or non-graduating senior.  
✓ Academic minimum: 3.5 GPA.  
✓ Have a demonstrated interest in basic research and in a career in the sciences.  
✓ Prior research experience. | Students will receive campus housing, a weekly stipend, and a travel allowance to and from MIT.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Mayo Clinic (Minnesota) | **The Summer Undergraduate Program in Biomedical Ethics Research (SUPER)** provides students the opportunity to participate in a mentored research experience that assists them in preparing for careers in healthcare, science, law, or bioethics. Students will be placed with a faculty mentor to work on an ethics research project for approximately 10 weeks. In addition to conducting mentored research, students participate in a robust ethics education curriculum. Students will also have an opportunity to shadow physicians in nearly every area of the clinic, observe clinical ethics consultations, and collaborate with other health care professionals depending on areas of interest. | ✓ Students must be enrolled in an undergraduate program. Graduating seniors are eligible.  
✓ Must have authorization to work and remain in the United States, without necessity for Mayo Clinic sponsorship.  
✓ All students must pass a background check and post-offer placement assessment prior to their start date. | Students will be paid $13/hour.  
**For more information**, visit the Mayo Clinic website’s posting for the internship found [here](#).  
Hear what previous students have to say about the opportunity [here](#).  
If you have additional questions, please send an email to the [program](#). |
| Mayo Graduate School College of Medicine (Minnesota) | **The Summer Undergraduate Research Fellowship (SURF)**, sponsored by Mayo Clinic Graduate School of Biomedical Sciences, offers a great way to build your skills as a young scientist or test your inclinations toward research. During the SURF students will work beside both young and established scientists on a broad range of biomedical research questions. | ✓ Currently enrolled undergraduate student of sophomore or junior standing attending a U.S. college.  
✓ Academic minimum: 3.0 GPA.  
✓ Seriously considering a medical research career as a PhD or MD/PhD.  
✓ International students attending a U.S. college or university are eligible to apply. | Students will receive a $6,000 stipend (minus taxes). Students are responsible for housing, meals, and transportation.  
*Note:* Most students live on-campus, which is available for approximately $650 per month.  
**For more information**, visit the [website](#).

| Medical College of Wisconsin (Wisconsin)            | **The Summer Program for Undergraduate Research (SPUR)** provides an opportunity for students to learn the potential of biomedical sciences as an interesting and fulfilling career. The SPUR program provides a mentored laboratory experience in science in which the student works on significant basic science research issues. SPUR hosts roughly 25-30 participants each summer from across the country who gain valuable research experience, refine critical thinking skills, build upon academic and professional networks and are introduced to various disciplines of science.                                                                                     | ✓ Academic minimum: 3.2 GPA.  
✓ Currently enrolled undergraduate student of sophomore or junior standing. Must be 18 years or older by program start date.  
✓ U.S. citizen or permanent resident (F-1 visa status is acceptable).                                                                                                                                                                                                                                                                       | Students will receive a $3,500 stipend and housing accommodations.  
**For more information,** visit the [website](#).  
If you have additional questions, please send an email to the [program](#).                                                                                                                                                                                                                                                                                                                                                           |
| Medical University of South Carolina (South Carolina) | **The Summer Research Program** allows students to become directly involved in the process of scientific discovery. The purpose of the SURP is to promote access to graduate education and to enhance specific skills that are required for success in a subsequent M.S., Ph.D. or M.D./Ph.D. in Biomedical Sciences. The program includes daily interaction with faculty, weekly seminars regarding research, and social activities. At the conclusion of the program, students will prepare a brief written paper and give an oral presentation about their research project. | ✓ Enrolled full time and in good standing in a baccalaureate program at the time of application.  
✓ Must be able to complete the entire 10 weeks of the program.  
✓ Academic minimum 3.2 GPA.  
✓ Priority is given to rising juniors and seniors with a strong interest in pursuing graduate studies.                                                                                                                                                                                                                                                                  | Students will receive a living allowance of $400 per week for a total maximum of $4,000. The program does not pay for travel/housing/meals, but a $200 subsidy is available and intended to defray the cost of travel. For students who need housing, a housing allowance of at least $1,000 will be provided.  
**For more information,** visit the [website](#).  
If you have additional questions, please send an email to the [program](#).                                                                                                                                                                                                                                                                                                                                                           |
| Meharry Medical College (Tennessee)                 | **The Meharry Cancer Summer Undergraduate Research Program (SURP)** is a 10-week intensive, hands-on research experience. The overall goals of the program are to expose students to different types of cancer research (clinical, biomedical, and community-based) and increase their awareness of cancer health disparities. Program participants will work under the mentorship of a Meharry Medical College and/or Vanderbilt University Medical Center faculty on a research project that explores the causes, diagnosis, prevention and/or treatment of cancer. | ✓ U.S. citizen or permanent resident.  
✓ Rising sophomore, junior or senior student in a degree granting program at a college/university in the US.  
✓ Minimum cumulative GPA of 3.0.  
✓ Interested in pursuing a career in biomedical research (PhD, MD, or MD/PhD).                                                                                                                                                                                                                      | Students will receive a stipend of $4,000 for the 10-week summer period, housing for out-of-town students near Meharry’s campus, and paid travel to/from Nashville, TN.  
**For more information,** visit the [website](#).  
If you have additional questions, please send an email to the [program](#).                                                                                                                                                                                                                                                                                                                                                           |

| Minneapolis Heart Institute Foundation (Minnesota) | The **MHIF Summer Research Internship Program – Clinical Cardiology** offers an opportunity for interns to contribute to clinical research studies and publications that impact patient care under the guidance of a physician and research staff mentor. During this 12-week internship, interns spend time shadowing physicians, participating in varied observations, and other field trips. At the conclusion of the internship, interns will showcase their research work at an open house and poster session. Many projects result in the intern having the opportunity to be an author on an article published in a national scientific journal. Some interns will also have the opportunity to present their work at a national cardiovascular conference. | ✓ Enrolled in a U.S.-based accredited degree program in a health care or related discipline.  
✓ Preference will be given to those who have completed their junior year by the start of the research internship. Strong applicants who have completed their sophomore year, just graduated from college or are enrolled in a post-baccalaureate pre-med program will also be considered.  
✓ Academic minimum: 3.6 GPA.  
✓ U.S. citizen or permanent resident. | A $480 per week stipend is given to assist with expenses. Housing support and meals are not paid for by the program. However, scholarship opportunities may be available for accepted students who need housing/transportation support.  
**For more information**, visit the [website](https://example.com).  
If you have additional questions, please send an email to the program. |
| Mount Sinai School of Medicine (New York) | The **Summer Undergraduate Research Program for Underrepresented Scholars (SURP4US)** provides an opportunity for students from underrepresented racial and or ethnic groups to work on a cutting-edge research project at the Icahn School of Medicine at Mount Sinai. Scholars will have the opportunity to conduct intensive research across various disciplines in a vibrant, diverse, and nurturing environment that will prepare them to submit PhD or MD/PhD applications. | ✓ Self-identify as a member of a group [underrepresented in graduate programs in biomedical sciences](https://example.com).  
✓ Currently enrolled undergraduate students of sophomore or junior standing.  
✓ Have a strong background in science, a passion for research, and a desire to pursue it professionally in a biomedical PhD or MD/PhD program. | Students will receive a $5,000 stipend and free housing but are responsible for meals and transportation. *Note: Housing is available in one of Mount Sinai’s residential buildings.  
**For more information**, visit the [website](https://example.com).  
If you have additional questions, please send an email to the program. |
| National Cancer Institute (Multiple Locations) | The NCI sponsored **Systems Biology and Physical Sciences in Cancer Summer Research Program (CSBC/PS-ON)** is a research opportunity designed specifically for students to gain experience in the interdisciplinary fields of systems biology and physical oncology. Each student participant will be working with a faculty mentor whose lab is pursuing a multi-disciplinary approach to cancer research. Projects include experimental and computational studies of the mechanisms underlying cancer processes. | ✓ Currently enrolled undergraduate student of rising junior or senior standing.  
✓ Must be U.S. citizen or permanent resident | Participants will receive $4,000 stipend, support for roundtrip travel to/from research site, and free housing. Additionally, participants will be given roundtrip travel & accommodations for a two-day research conference at the NIH.  
**For more information**, please visit the [website](https://example.com).  
If you have additional questions, please send an email to the program. |

| National Heart, Lung and Blood Institute (North Carolina) | The **Summer Institute in Biostatistics (SIBS) Program at North Carolina State University** offers a 6-week program for students to learn about principles of applied biostatistics, gain hands-on learning by analyzing actual data, and interact with practicing biostatisticians and physicians. Students may also earn college credit as part of their participation in the program. | ✓ Currently enrolled undergraduate student, including seniors graduating in Spring before start of program.  
✓ Majoring in mathematics, science, or other quantitatively oriented areas of study.  
✓ U.S. citizen or permanent resident. | Housing, meals, travel expenses to and from the program, and some extracurricular activities are covered. Participants will also have access to university computing systems and libraries.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| National High Magnetic Field Laboratory (Florida) | The **Research Experience for Undergraduates (REU)** is an 10-week summer internship that matches undergraduate students with scientists at the Magnet Lab’s three sites, offering them unique opportunities to explore science at the extremes of magnetic fields, pressure and temperature while working alongside some of the finest scientists, magnet designers and engineers in the world. The MagLab offers a wide range of research experiences in physics, chemistry, biological sciences, geochemistry, materials science and magnet science and engineering. | ✓ U.S. citizen or permanent resident.  
✓ Must be in first, second, third or senior year (not graduating in the Fall). | Each student receives a $5,000 stipend and, if necessary, a travel stipend of up to $600. Housing is covered by the program.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to [Dr. Kawana Johnson](#). |
| National Institutes of Health (District of Columbia) | The **Introduction to Cancer Research Careers (ICRC)** program gives highly qualified students and recent graduates the chance to participate in cancer research at the NCI. Selected candidates will interview with NCI Principal Investigators and potentially experience an internship in an NCI research lab or office. Interns will have the option to attend seminars on topics related to basic, clinical, biomedical and behavioral research, human health, healthy lifestyles, and health disparities. Interns will also be able to participate in professional development workshops during their time at NCI. | ✓ Undergraduate student OR post-baccalaureate (within two years) OR graduate student.  
✓ U.S. citizen or permanent resident.  
✓ 18 years of age or older.  
✓ Cancer-related research interest from an underrepresented ethnic group.  
✓ Academic minimum: 3.2 GPA. | The CRI program provides a stipend that is based on participants’ academic level. Housing is provided to students who are financially eligible. Travel to and from Bethesda is provided for out-of-state participants. Students are responsible for their own meals.  
**For more information**, visit the [website](#).

| National Institutes of Health (Maryland) | The NIH Community College Summer Enrichment Program (CCSEP) provides an opportunity for community college students interested in biomedical research to conduct research in an intramural lab at the NIH. Participants will attend workshops and courses to prepare for careers in health care and social, behavioral, and biomedical research. The program culminates with the Summer Poster Day, in which interns will showcase their project. | ✓ U.S. citizen or permanent resident.  
✓ Enrolled at least half-time in a U.S. accredited Community College.  
✓ At least 17 years old by June 15  
✓ Academic minimum: 3.0 GPA.  
Students without previous research experience are encouraged to apply.                                                                 | Students will receive a monthly stipend based on education level and experience. Participants are responsible for housing. Funds for local transportation to and from the NIH are provided.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to Dr. Erika Barr. |
| National Institutes of Health (Maryland) | The Division of Cancer Epidemiology and Genetics hosts a research experience designed for students interested in exploring careers in cancer epidemiology and genetics. Students may also attend lectures offered under the NIH Summer Seminar Series, participate in DCEG meetings and seminars, attend formal NIH lectures, and participate in the DCEG Poster Day. | ✓ High school OR undergraduate OR graduate student (including medical and dental students).  
✓ Must be 17 years of age or older by June 15.  
✓ U.S. citizen or permanent resident.                                                                 | Participants will receive a stipend based on academic level. Students are responsible for housing, meals, and transportation.  
*Note: Nearby housing is available.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| National Institutes of Health (Maryland) | Participants in the Summer Internship Program (SIP) work one-on-one with some of the leading scientists in the world. Trainees on the main campus in Bethesda, MD will attend a lecture series featuring distinguished NIH investigators, informal lunchtime talks on training for research careers, and participate in a trainee poster session. | ✓ Currently enrolled (at least half-time) high school OR undergraduate OR graduate student.  
✓ U.S. citizen or permanent resident.                                                                 | The stipend for trainees is adjusted annually.

| National Institutes of Health (Multiple locations)   | The **STEP-UP Program** is designed to expose underrepresented and/or disadvantaged students to research in the areas of diabetes, endocrinology, metabolism, nutrition, obesity, and digestive, liver, urologic, kidney, and hematologic diseases. The program begins with an online ethics course, followed by travel to the assigned research location to begin the 10-week, full-time summer research experience. The program culminates with a trip to the Annual Undergraduate STEP-UP Scientific Session and Research Presentations in August. Students will present their summer research to peers, mentors, and scientific experts. | ✓ Currently enrolled undergraduate student.  
✓ Academic minimum: 3.0 GPA.  
✓ U.S. citizen, non-citizen national or legal permanent resident.  
✓ Member of an underrepresented group in biomedical sciences OR have been diagnosed with a disability that substantially limits one or more major life activities OR from an economically disadvantaged background OR be the first generation in family to graduate from a four-year college or university. | Students will receive a stipend. In addition, accommodations and travel expenses to the Annual Undergraduate Scientific Session and Research Presentations in Atlanta, Georgia are provided. Students are responsible for travel to and from the research location, housing, ground transportation, parking, and meals.

| New York University             | The **Sackler Institute of Graduate Biomedical Sciences and the Office of Minority Affairs** offers a **Summer Undergraduate Research Program (SURP)** at NYU Medical Center. This 9-week program provides students an opportunity to conduct research and gain exposure to the academic medical environment. Students will work with faculty in biochemistry, biomedical imaging, cellular and molecular biology, and other fields. At the end of the summer, interns present research at the Leadership Alliance National Symposium (LANS). | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduate students who have completed their sophomore or junior year.  
✓ Completion of at least 1 full semester of bench laboratory research.  
✓ Interest in biomedical research career. | Students will receive a $3,500 stipend, housing, and roundtrip travel accommodations.  
**For more information**, visit the website.  
If you have additional questions, please send an email to Amanda Tufekcier. |
| Northeastern University         | The **Department of Biology at Northeastern University** has a **Summer Research Experience for Undergraduates Program** that immerses students in the world of research science, exposing them to various aspects of scientific investigation and preparing them for biologic science careers via workshops, lectures, presentations, and field trips. The program culminates in a Summer Research Symposium, where students present their research. | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduate student of rising sophomore through rising senior status, as of the start of the summer program.  
✓ Strong interest in a career that involves scientific research.  
✓ Women, first-generation college students, and students from groups underrepresented in the sciences are encouraged to apply. | Students will receive a $5,750 stipend and free on-campus housing. Students are responsible for travel.  
**For more information**, visit the website.  
If you have additional questions, please send an email to Rebeca Rosengaus or Wendy Smith. |
| Northwestern University        | The **Summer Research Opportunity Program (SROP)** provides an opportunity for direct involvement with research faculty and exposure to graduate student life. The mission of the SROP is to increase diversity among students pursuing graduate education and provide valuable research experience. The 8-week program includes research with faculty, enrichment activities, and a research conference. | ✓ Currently enrolled undergraduate student of sophomore or junior standing.  
✓ Academic minimum: 3.3 GPA.  
✓ U.S. citizen or permanent resident.  
✓ Have an interest in pursuing a doctoral degree (PhD) at Northwestern University. Those interested in pursuing an MBA, JD, or MD are not eligible. | Students will receive a $4,500 stipend, round trip travel, on-campus housing, and $200 for meals.  
**For more information**, visit the website.

| Rutgers University (New Jersey)       | The **Research Intensive Summer Experience (RISE)** and **Summer Undergraduate Research Fellowship (SURF)** at Rutgers are nationally acclaimed summer research programs for outstanding undergraduates from diverse backgrounds. Scholars participate in 10 weeks of cutting-edge research in interdisciplinary areas under the guidance of carefully matched mentors. | ✓ U.S. citizen or permanent resident.  
✓ Completion of at least the sophomore year.  
✓ Interest in considering a future PhD program.  
✓ Academic minimum: 3.0 GPA. | Students will receive a $4,000 stipend, free on-campus housing (for students unable to commute), and travel reimbursement up to $500.  
**For more information**, visit the [RISE](https://rise.rutgers.edu) and [SURF](https://rise.rutgers.edu) websites.  
If you have additional questions, please send an email to the program. |
| Sage Bionetworks (Washington)         | Sage Bionetworks is seeking students who are self-starters with the ability to multitask and drive projects to completion for a 6-month, paid **Software Engineering Internship**. Accepted interns will join the technology team responsible for the design, creation, testing, and deployment of the Synapse and Bridge systems. This is a unique opportunity to gain hands on software development experience while working on a project that has the potential to make significant advances in the area of human health. | ✓ Enrolled in an accredited degree program working towards a degree in computer science or a related discipline with at least one term to finish after the completion of the internship.  
✓ Have the ability to commit to a 6 month, full time position.  
✓ Have experience with a variety of operating systems (see their website for more information). | This is an intern level position on the company’s engineering career ladder, with a compensation rate of $38/hour.  
Actual compensation is dependent upon experience.  
**For more information**, visit the [website](https://sagebionetworks.org). |
| San Francisco Department of Public Health (California) | **SHARP (Summer HIV/AIDS Research Program)** is an innovative 12-week summer mentored internship and learning experience designed to inspire students from underrepresented communities to pursue further studies and careers in public-health oriented research. Accepted interns will conduct a focused research project under the mentorship of experienced faculty. Interns will also attend a series of weekly seminars on topics including research design and methods, HIV prevention and approaches, substance & mental health research, professional development, health & racial equity, and possible research careers. There are also opportunities to shadow clinical trial and community outreach staff, attend community consultations on research, and participate in social and networking events. | ✓ Candidates must be legally eligible to work in the U.S.  
✓ Must be currently enrolled in an undergraduate or certificate program or be a recent graduate (less than 2 years since graduation).  
✓ Individuals from communities typically underrepresented in the field of research are strongly encouraged to apply. This includes African Americans, Latinx, persons of indigenous descent (including Native Americans, and natives of Alaska, Hawaii, and the US Pacific Islands), persons with disabilities, persons from disadvantaged backgrounds, and individuals who identify as transgender, lesbian, gay, or bisexual (LGBT). | Students will receive a stipend of approximately $15/hour and support for local transportation within San Francisco is available.  
**For more information**, visit the [website](https://sagebionetworks.org). |

The 8-week program provides the opportunity for students to participate in a research project, while working with a faculty mentor. Students will attend weekly science research seminars to explore different areas of research in addition to presenting their project findings at the conclusion of the program. | ✓ U.S citizen or permanent resident.  
✓ Currently enrolled undergraduate student who has completed one year of studies by the start of the program.  
✓ Academic minimum: 3.0 GPA.  
✓ Majoring in biology, biochemistry, molecular biology, genetics, chemistry, physics, computing, engineering, mathematics, or a related field. | Students will receive a $4,000 stipend, roundtrip travel, and on-campus housing during the program.  
**For more information**, visit the [website](https://www.stowers.org).  
If you have additional questions, please send an email to the program. |
| **St. Jude Children’s Research Hospital (Tennessee)** | The **Pediatric Oncology Education Program** at St. Jude Children's Research Hospital offers a unique opportunity for students preparing for careers in the biomedical sciences, medicine, nursing, pharmacy, psychology, or public health to gain biomedical and oncology research experience. The POE program provides a short-term training experience in either laboratory or clinical research. A primary goal of the program is to encourage students to pursue a career in cancer research, either as a laboratory-based scientist or a physician scientist. | ✓ U.S. citizen or permanent resident.  
✓ Academic minimum 3.4 GPA  
✓ Currently enrolled undergraduate student of at least sophomore standing  
OR  
graduate student preparing for a career in medicine or biomedical sciences.  
✓ Prior research experience. Students with an interest in cancer research are particularly encouraged to apply. | Students will receive a $400/week stipend, in addition to no-cost housing near campus. Participants are responsible for their travel expenses.  
**For more information**, visit the [website](https://www.stjude.org).  
If you have additional questions, please send an email to Dr. Suzanne Gronemeyer. |
| **Substance Abuse and Mental Health Services Administration’s (SAMHSA) Center for Substance Abuse Prevention (Multiple Locations)** | Through the **SAMHSA Internship Program**, interns gain practical experience through projects, special assignments, or research that support federal, state, and community-based programs, policies, and best practices in the prevention and treatment of substance abuse and mental illness. For fifteen weeks at the SAMHSA headquarters in Rockville, Maryland, each intern will be able to work under the guidance of a SAMHSA manager in a department whose function closely matches their course of study and field of interest. | ✓ U.S. citizen or permanent resident.  
✓ Be enrolled and have completed their freshman year in a degree-seeking program (BA/BS, Masters, JD, MD, or Ph.D.) at an accredited higher education institution.  
✓ Academic minimum 3.0 GPA | Students will receive a stipend.  
**For more information**, visit the [website](https://www.samhsa.gov).  
If you have additional questions, please send an email to the program. |

| **Summer Health Professions Education Program (Multiple Locations)** | The Summer Health Professions Education Program (SHPEP) is a summer enrichment program that strives to strengthen the academic proficiency and career development of students underrepresented in the health professions and prepare them for a successful application and matriculation to health professions schools. SHPEP is implemented at 12 universities across the nation. Each institution provides scholars with academic enrichment in the basic sciences and math, clinical experiences, career development activities, learning and study skills seminars, and a financial planning workshop. Program sites vary on how they deliver each of these required components and their program start date, to see a list of participating institutions visit the website. | ✓ U.S. citizen, permanent resident, or an individual granted deferred action for childhood arrivals (DACA) status by the U.S. Citizenship and Immigration Services.  
✓ Currently enrolled as a freshman or sophomore in college.  
✓ Identifies with a group that is racially/ethnically underrepresented in the health professions; OR comes from an economically or educationally disadvantaged background; AND/OR has demonstrated an interest in issues affecting underserved populations. | Students will receive a $600 stipend, weekly meal allowance, on campus housing, and up to $500 in travel expenses.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |
| **Summer Systematics Institute (California)** | The California Academy of Sciences offers a 9-week paid research internship. Students are matched with a chosen adviser on a project relating to the discipline of the adviser and student. Participants also receive instruction while taking part in a museum-based curriculum that includes tours, lectures, and lab exercises on phylogenetic systematics, molecular techniques, biodiversity, evolutionary biology, global change, and other contemporary issues in the natural sciences. | ✓ U.S. citizen or green card holder.  
✓ An undergraduate student who will not have graduated before the start of the program. | Students will receive a $5,400 stipend. Travel to and from San Francisco will be provided. Housing will be provided in dormitories in San Francisco, with details to be provided upon selection of interns.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |
| **SUNY Upstate Medical University (New York)** | The Summer Undergraduate Research Fellowship (SURF) program is a 10-week program in which students will receive faculty guidance while formulating an independent research proposal, conduct research under the supervision of a faculty mentor, and write a research paper and have the opportunity to see their work published. In the process, students will attend research seminars, present and participate in a student journal club, present their work, and participate in discussions on alternative careers in research and how to apply to graduate school. | ✓ Currently enrolled undergraduate student between the summer of their junior and senior year.  
✓ Majoring in chemistry, biology, or a related field.  
✓ Strong interest in pursuing a PhD in biomedical investigative research. | Students will receive a $3,500 stipend, as well as housing.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |

| Tufts University (Massachusetts)     | The **Building Diversity in Biomedical Sciences (BDBS) Program** offers a ten week, mentored research experience for students interested in pursuing future PhD or MD/PhD studies. Trainees also attend scientific seminars and workshops on academic and career guidance, participate in organized social activities, and have free time to explore the Boston area. | ✓ U.S. citizen or permanent resident.  
✓ Must have successfully completed at least one year of college.  
* The NIH and the Graduate School of Biomedical Sciences encourage applicants from members of groups that are under-represented in the biomedical sciences. | Trainees receive a $4,000 stipend, travel expenses within the US, and are provided with on-campus housing.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| University of Alabama at Birmingham (Alabama) | The **PARAdiGM Undergraduate Research Program** is to provide undergraduate students from disadvantaged and underrepresented minority backgrounds with an opportunity to explore the MD/PhD field for two summers. For 8 weeks, interns will be paired with a faculty member to conduct a research project and to join in on clinical experiences. | ✓ U.S. citizen or permanent resident.  
✓ Sophomore or junior level college undergraduate.  
✓ Academic minimum: 3.0 GPA.  
✓ Students that have no local campus access to research experiences of physician-scientist role models and students from groups underrepresented in the sciences are encouraged to apply. | Students will receive a $3,200 stipend and campus housing. Students are responsible for travel expenses.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to Randy L Seay. |
| University of Alabama at Birmingham (Alabama) | The **Summer in Biomedical Sciences (SIBS) Undergraduate Research Program** provides an opportunity for undergraduates to be instructed in techniques of modern biology while becoming integrated members of a vibrant clinical and scientific community. During the 8-week summer program students will work with UAB faculty members on mentored research projects. SIBS is intended for students with a desire to pursue careers in the biomedical sciences. | ✓ U.S. citizen or legal permanent resident.  
✓ Sophomore or junior level college undergraduate.  
✓ Academic minimum: 3.0 GPA. | Students will receive a $3,200 stipend as well as on campus housing. Students will be responsible for travel expenses.

</table>
| University of Arizona (Arizona) | The **Summer Research Institute (SRI)** offers an outstanding opportunity to learn how to conduct research and prepare for graduate studies. The purpose of SRI is to provide students with the opportunity to work with faculty on a research project; give an understanding of the approaches, issues, and research methodologies in a chosen field; encourage students to consider advanced study in the discipline of their choice; prepare students to be competitive in the graduate application process and beyond; and enhance leadership skills through personal development workshops and interaction with peers. | ✓ Currently enrolled undergraduate of junior or senior standing.  
✓ U.S. citizen, legal permanent resident, or refugee status.  
✓ Academic minimum: 3.0 GPA.  
✓ Students from first-generation, low-income, or underrepresented background are encouraged to apply. | Students will receive a $5,000 stipend and six units of upper-division undergraduate course credit (tuition and fees paid by the University and the Graduate College).  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to [Donna Treloar](mailto:). |
| University of Arizona (Arizona) | The **Student Transformative Experiences to Progress Under-represented Professionals (STEP-UP) in Cancer Prevention** program is a multidisciplinary initiative led by the Cancer Prevention and Control and Health Disparities Programs’ faculty at the University of Arizona Comprehensive Cancer Center. This 12-week program is uniquely designed to provide students with an intensive, transformative, experiential research program that aims to train a diverse cancer workforce that will be ready to meet the challenge of reducing the cancer burden. | ✓ Currently enrolled junior or senior undergraduate student.  
✓ Academic minimum: 2.75 GPA.  
✓ U.S. Citizen or permanent resident (International students are not eligible for this program due to federal funding restrictions)  
✓ Students from underrepresented, disadvantaged, non-traditional or first-generation college backgrounds or who attend schools with limited research opportunities are encouraged to apply. | Students will be paid $12/hour.  
Transportation and housing assistance is available.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to [Karen Dickeson](mailto:). |
| University of Arkansas for Medical Sciences (Arkansas) | The **UAMS Summer Undergraduate Research Program (SURP)** is a 9-week program designed to provide students with experiences in cardiovascular, pulmonary, or hematologic research. SURP participants will conduct a research project with a UAMS faculty mentor. At the end of the summer, students will present their summer research and submit a 2-page paper summarizing their research project and results. SURP participants are also required to attend weekly lectures throughout the summer. | ✓ U.S. citizen or permanent resident  
✓ Minimum GPA of 2.5  
✓ Applicants must have completed at least one year of undergraduate education to be eligible  
* Applicants who are a member of an underrepresented group, disabled, or from a disadvantaged background are encouraged to apply. | Students will receive a $4,320 stipend for the 9-week period.  
Students who live outside of Little Rock and surrounding cities may be eligible for a per diem of $2,400 for housing and travel reimbursement.  
**For more information**, visit the [website](#).

| University of California, Berkeley (California) | **The Summer Research Experience for Undergraduates** is designed to expose participating students to core Molecular, Cell, Developmental, Evolutionary, and Ecosystem Biology. Under the direct guidance of a UCB faculty mentor, usually with a graduate student or postdoctoral co-mentor, students will gain first-hand research experience and training in state-of-the-art research facilities, working on individual projects. Students will prepare an abstract on their project and are encouraged to submit it for poster presentations at national meetings. During the last week, a mini-symposium will permit the participants to share their accomplishments. | ✓ Must be a U.S. citizen or permanent resident.  
✓ Enrolled full-time at a four-year college or university. Rising juniors will be given preference.  
✓ Must have completed at least one course in biology and chemistry before applying.  
✓ Able to show proof of health insurance for duration of the program. | Students will receive a $6,000 stipend, on-campus housing, some meals, and travel support (up to $600).  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to [the program](#). |
| University of California, Davis (California) | **The Hugh Edmondson Summer Research Internship Program** offers a 8-week research experience for motivated college students who have demonstrated a strong interest in the health sciences. Students will conduct research under the guidance and mentorship of pathology faculty in various laboratories. In addition to research activities, the program offers weekly lectures and problem-based learning exercises that promote investigative and critical thinking. | ✓ Currently enrolled undergraduate student of freshmen, sophomore, or junior standing.  
✓ Demonstrated interest in the health sciences. | Participants will receive a $2,000 stipend, as well as assistance finding housing if needed.  
**For more information**, visit the [website](#).

</table>
| University of California, Los Angeles (California) | The UCLA Public Health Scholars Training Program provides undergraduate students the opportunity to explore the field of public health through hands-on training, structured workshops, group excursions, and leadership and professional development. The program works with community-based organizations, health systems, and government agencies to offer field placement opportunities for scholars that focus on health equity. Scholars are placed at these partnering organizations throughout Los Angeles where they are exposed to the spectrum of public health practice and provided with professional mentors. | ✓ Interest in exploring a career in the field of public health.  
✓ By the start of the program, students must be enrolled in a four-year institution and have completed at least two years of undergraduate education OR Recent college graduates (Fall/Winter 2021 or Spring 2022) who have not been accepted into a graduate program.  
✓ Willingness to attend social and volunteer events on evenings and occasional weekends.  
✓ Willingness to stay engaged with program for alumni tracking, professional development opportunities, maintaining contact with cohort, and participating in recruitment for the 2022 cohort. | Scholars will receive a $3,000 stipend, housing, funding to cover some meals, and metro pass or funding for gas. Scholars that do not live in California will receive funds for travel to and from the program in Los Angeles. Scholars attend a paid trip to the Centers for Disease Control and Prevention in Atlanta, Georgia with Public Health Scholars from other programs across the nation.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| University of California, Los Angeles (California) | Bruins-In-Genomics (B.I.G.) Summer Research Program is an 8-week full-time immersion program for undergraduates interested in quantitative and computational biology and learning how to read and analyze genes and genomes. Through this program students will have the opportunity to experience graduate-level coursework, and learn the latest cutting-edge research, tools and methods used by leading scientists to solve real-world problems. | ✓ U.S. citizen, permanent resident, or F-1 visa holder.  
✓ Rising junior or senior.  
✓ GPA of 3.0 or higher.  
✓ Some familiarity with at least one programming language (e.g. python, perl, R, Java, MAT-LAB, etc.). | Participants will receive a $4,200 stipend and on campus housing. Additional funds are also available for GRE prep courses and for travel allowances.

</table>
| University of California, Los Angeles (California) | The **Summer Program for Undergraduate Research - Life and Biomedical Sciences (SPUR-LABS)** program provides a rigorous research training experience for undergraduates with interests in a broad range of bioscience disciplines—from molecules to organisms and from basic to translational science. The program aims to contribute to diversity and the elimination of barriers to participation in bioscience research careers and is designed for students participating in honors research programs that foster transition to doctoral programs (such as Maximizing Access to Research Careers—MARC). | ✓ U.S. citizen or permanent resident.  
✓ Completed at least two years of undergraduate study by start.  
✓ Minimum GPA of 3.0.  
✓ Intention to pursue a Ph.D. or M.D./Ph.D. in a bioscience field and not admitted or enrolled in a graduate program (M.S. or Ph.D.) at the time the program begins. | Participants will receive a $4,000 stipend for 8 weeks and $5,000 for 10 weeks, on campus room and board, and up to $500 in travel allowance for out of state students ($250 for California residents). Additionally, a fee waiver for UCLA Graduate Application is offered to program participants. **For more information**, visit the [website](#). If you have additional questions, please email the [program](#). |
| University of California, San Diego (California) | The **MSTP Summer Undergraduate Research Fellowship** is a program for students who are interested in pursuing an MD/PhD degree in the biomedical and medical sciences. Students will conduct an 8-week research project with a faculty mentor in a biomedical sciences laboratory, shadow a physician-scientist on clinical experiences, attend career development and weekly seminars, and have the opportunity to present research at the end of the program. | ✓ U.S. citizen or permanent resident, currently enrolled at an accredited school or university of at least sophomore standing OR currently enrolled at a community or junior college in at least three courses per academic term and having completed six courses OR  
✓ Member of a traditionally underrepresented racial or ethnic group in the health-related sciences OR an individual with a disability OR an individual from disadvantaged backgrounds. | Students will receive a $4,160 stipend, on-campus housing, and roundtrip travel allowance (up to $500). Students are responsible for meals. **For more information**, visit the [website](#). If you have additional questions, please send an email to the [program](#). |
| University of California, San Francisco (California) | Students selected for the **UCSF Summer Research Training Program (SRTP)** spend up to ten weeks working with UCSF faculty members on research projects. Participants in the program take part in seminars, lectures, and social events, creating a cohesive and supportive community. At the end of the program, students give presentations of their research and get valuable feedback from students, postdocs, and faculty at UCSF. | ✓ U.S. citizen or permanent resident.  
✓ Currently-enrolled undergraduate student that has completed at least four semesters or six quarters of undergraduate study prior to the beginning of the program.  
✓ Have a desire to pursue a PhD in one of the disciplines offered by the UCSF Graduate Division in life/health sciences (listed on the website). | Students will receive a $5,000 stipend, up to a $500 allowance for travel to and from San Francisco, housing in San Francisco (double-occupancy), health insurance coverage, and public transportation pass. **For more information**, visit the [website](#). If you have additional questions, please contact [Zachary Smith](#). |

| University of Iowa (Iowa)       | The **Biomedical Summer Undergraduate Research Program (BSURP)** is intended for undergraduate students to gain laboratory research experience in biochemistry. Students will conduct research with a faculty mentor and participate in seminars and workshops to explore graduate education and careers in the sciences. Students will also present their research at the end of the program. | ✓ U.S. citizen or permanent resident  
✓ Students who have completed the sophomore or junior year, majoring in any area of the biological sciences at an accredited four-year college or university, are eligible.  
✓ Women and members of underrepresented minority groups are encouraged to apply. | Students will receive a competitive stipend, on-campus housing and up to $500 for travel to and from Iowa City.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| University of Iowa (Iowa)       | The **Summer Research Experience for Undergraduates in Microbiology** is a 10-week, hands-on research experience for students interested in pursuing a career in the Biological Sciences. The focus of the program is a hands-on research project conducted under the guidance of faculty and graduate student mentors. Students will also attend lectures to broaden their understanding of microbiology and educate them about graduate school and career options. | ✓ Will return for at least one semester of undergraduate study before graduation, majoring in a Biological Science, and intend to pursue graduate school and a career in biological research.  
✓ U.S. citizen or permanent resident.  
✓ Limited access to research opportunities at their institution. | Students will receive a $6,000 stipend plus $630 for incidental expenses.  
Housing and travel costs are paid by the program.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| University of Iowa (Iowa)       | The **University of Iowa Summer Undergraduate Medical Scientist Training Program Research (SUMR)** program offers an intensive experience for undergraduate students interested in combined MD/PhD training for a career as a physician-scientist. The 8-week program provides students with experience in research laboratories and exposure to clinical medicine and medically-relevant research. | ✓ U.S. citizen or permanent resident.  
✓ Be a rising junior or senior (your earliest anticipated graduation should not be before December 2022).  
✓ Major in a STEM field or premed.  
✓ Prior research experience required. | Participants will receive a $4,150 stipend, on-campus housing, and a round-trip travel allowance.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| University of Kentucky (Kentucky) | The **Summer Program in the Biochemical Sciences** is a 10-week program in which motivated undergraduates conduct laboratory research. Interns will learn and build on basic lab techniques to create a project, which will be presented at the conclusion of the program. Students will also learn more about various scientific research careers. The goal of the Program is to encourage student participants to pursue careers in the biochemical sciences. | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduate student of freshman, sophomore or junior standing.  
✓ Residents of Appalachia and/or underrepresented minorities in the sciences are especially encouraged to apply. | Participants will receive a stipend and on-campus housing. Reasonable travel expenses can be reimbursed.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to Dr. Trevor Creamer. |

| University of Texas Medical School at Houston (Texas) | The **McGovern Medical School Summer Research Program for Undergraduates (MedSURP)** is directed at students with a strong interest in pursuing a future career in medicine. Students will have the opportunity to work with researchers and clinicians focusing on research topics with direct relevance to therapeutic approaches and patient care. Students will also have the opportunity in seminars designed to provide exposure to a wide range of biomedical research topics, and to educate students in how to apply to medical school. | ✓ Currently enrolled sophomores, juniors, and non-graduating seniors.  
✓ U.S. citizen or permanent resident.  
✓ Must have 12 hours of completed coursework in a science discipline.  
✓ Must be at least 18 years of age by start of program. | Students will receive a $3,000 stipend. Minimal on-campus housing is available at a discounted rate.  
**For more information**, visit the [website](#). If you have additional questions, please send an email to Linh Trinh. |
| University of Texas Medical Branch at Galveston (Texas) | The **Neuroscience Summer Undergraduate Research Program (NSURP)** provides students the opportunity for cutting-edge, interdisciplinary research in the area of neuroscience. Under the guidance of a faculty mentor, you will learn biomedical neuroscience research skills and become familiar with techniques like cell culturing, isolation of stem cells, immunoassays, animal surgery, mass spectroscopy, and electrophysiology. Students will participate in weekly seminars and journal clubs in addition to the culminating poster session at the end of the program. | ✓ U.S. citizen or permanent resident.  
✓ Enrolled in undergraduate program at an accredited institution.  
*Applications from women and members of underrepresented minority groups are particularly encouraged and welcome.* | Students will receive a $4,000 stipend and the program will help arrange and supplement your housing costs.  
**For more information**, visit the [website](#). If you have additional questions, please send an email to program coordinator, Laura Teed. |
| University of Texas Southwestern (Texas) | The **Quantitative and Physical Sciences Summer Undergraduate Research Fellowship (QP-SURF)** is a research training experience for students preparing for careers in biomedical research. This 10-week program features conducting individual research projects with UT graduate school faculty and introduction to day-to-day laboratory research life. Projects will be presented at the end of the program. Research areas include: biomedical engineering, biophysics, computational biology, organic chemistry, and systems biology. | ✓ Currently enrolled undergraduate student who has completed their sophomore year, majoring in a physics, computer science, mathematics, biomedical engineering, or chemistry program.  
✓ U.S. citizen or permanent resident or have an F1 visa.  
*Note: Selection criteria includes: grades, relevant experience, letters of recommendation, and career goals in pursuing a PhD or MD/PhD.* | Students will receive a $5,000 stipend. If a fellow requires housing, that cost will be covered by the program. Fellows are responsible for their own travel expenses.  
**For more information**, visit the [website](#). If you have additional questions, please send an email to the [program](#). |

|                                    | The Summer Program for Undergraduate Research (SPUR) provides undergraduate students with an intensive 10-week research experience under the mentorship of a faculty member. The program provides opportunities to gain research experience in a variety of disciplines. The program emphasizes a collaborative research experience under the supervision of a University of Utah faculty member. The program also emphasizes a cohort experience via welcome and closing receptions, peer advising, weekly education events, bi-weekly program meetings, and optional on-campus housing. | ✓ Currently enrolled degree-seeking undergraduate in the Fall semester (and not graduating before December) following the summer program.  
✓ Eligible to work in the United States.  
✓ At least 18 years old by May. | Students will receive a $5,000 stipend. Students may be eligible to receive a travel reimbursement up to $500 total for travel-related expenses to/from Salt Lake City. All participants have the option of using on-campus housing (participants pay $250; the rest of the on-campus housing expense is covered by the program). For more information, visit the program’s website. If you have additional questions, please send an email to Megan Shannahan. |

| Wake Forest University School of Medicine (North Carolina) | Through the **Summer Scholars Program**, Wake Forest Institute for Regenerative Medicine offers undergraduate students an opportunity to engage in exciting, multidisciplinary research firsthand at the interface of engineering and biology in challenging areas of tissue engineering and regenerative medicine. During the 10-week program, students will carry out research under the supervision of prominent biomedical scientists, write a research summary, conduct an oral presentation, and have the opportunity to see their work published. | ✓ Minimum GPA of 2.85.  
✓ Must have completed at least two semesters of undergraduate education.  
✓ Must be at least 18 years of age by the first day of the program.  
✓ U.S. citizen or permanent resident (international students who currently have a J-1 or F-1 visa and who are already attending school in the United States are eligible to apply). | Students will receive a $5,000 stipend and housing allowance provided based on funding source. Travel expenses are not paid by the program.  
**For more information,** visit the [website](#).  
If you have additional questions, please send an email to the program. |
| Washington State University (Washington) | **Research in Interdisciplinary STEM Education (RISE)**, is a 9-week summer research experience for undergraduate students in chemistry, education, life sciences, mathematics, or physics. Participants will join interdisciplinary teams mentored by faculty to investigate STEM learning across formal and informal environments with a focus on understanding issues related to inclusivity and diversity in STEM. | ✓ U.S. citizen or permanent resident.  
✓ Will be returning to an undergraduate program in the Fall following the summer internship.  
* Women, first-generation, and individuals from non-PhD granting institutions and/or who identify with underrepresented populations are especially encouraged to apply. | Students will receive a $5,750 stipend. Travel awards are available for students who demonstrate financial aid.  
**For more information,** visit the [website](#).  
If you have additional questions, please send an email to the program director, Dr. Erika Offerdahl. |
| Washington University in St. Louis (Missouri) | The **Amgen Scholars Program**, **Biomedical Research Apprenticeship Program (BioMedRAP)**, and the **BP-ENDURE: St. Louis Neuroscience Pipeline Program** are designed to prepare undergraduate students for admission and the rigor of top tier PhD and MD/PhD programs. | ✓ Currently enrolled undergraduate student.  
✓ U.S. citizen or permanent resident.  
✓ Previous research experience is encouraged.  
✓ Minimum GPA of 3.2. | Students receive a stipend, free housing, and free travel to and from St. Louis.

| Washington University in St. Louis (Missouri) | The **Opportunities in Genomics Research Undergraduate Scholars Program** is a 10-week summer program that focuses on engaging students in mentored genomics research, training them in scientific presentation and the basics of computer programming, and preparing them for a career in research-based science. All students participating will take part in cutting-edge research as part of an independent research team in a lab at the Washington University School of Medicine and will give oral presentations on their research findings as part of a Closing Symposium at the end of the program. | ✓ Must be a sophomore, junior, or senior at a four-year institution at the time of program entry and identify as a member of an underrepresented group as defined by the NIH.  
✓ GPA: Competitive – highly competitive.  
✓ Residency: Must be a US citizen or permanent resident.  
✓ Major/Degree: Science, technology, engineering or mathematics (with some exceptions). | Students receive a competitive stipend of at least $4,500. In addition, on-campus housing and travel are paid for by the program.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Weill Cornell Graduate School of Medical Sciences (New York) | The **ACCESS Summer Research Program** at Weill Cornell Graduate School of Medical Sciences (WCGS) is designed to train underserved college students in the biomedical sciences. Students will perform hands-on research in a biomedical research laboratory under the guidance of a faculty member. In addition to gaining laboratory experience, students will attend lectures aimed at enhancing their understanding of the current status of biomedical research, the pathways available for entering research careers, and the range of available career opportunities. | ✓ U.S. citizen or permanent resident.  
✓ Currently enrolled undergraduate student who has one semester remaining of undergraduate education by start of the summer program.  
✓ Academic minimum: 3.0 GPA.  
✓ Students from groups traditionally underrepresented in research careers in the sciences, social sciences, and humanities, individuals with disabilities, disadvantaged backgrounds are particularly encouraged to apply. | Students will receive a $4,000 stipend for participating in the 10-week program and up to $500 in travel expenses. On-campus housing is provided to those who are not from the New York City area.  
*Applicants must have individual medical insurance for the duration of the program.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Weill Cornell Medical College (New York) | The **Gateways to The Laboratory Summer Program** is a 10-week program designed to provide students a mentored individual research project at Weill Cornell Medical College, Rockefeller University, or Memorial Sloan-Kettering Cancer Center. Select interns participate in workshops for improving lab techniques and clinical research skills, scrub into surgeries at the New York-Presbyterian Hospital, receive mentorship with a current MD-PhD student, and have a chance to present their research at a poster presentation. | ✓ Currently enrolled undergraduate student of freshman or sophomore standing.  
✓ U.S. citizen or permanent resident.  
✓ Students from groups historically underrepresented in medicine and science (individuals from racial and ethnic minorities, individuals from socioeconomically disadvantaged backgrounds, and/or individuals with disabilities). | Students receive a stipend of $6,000, housing in Weill Cornell Medicine student housing (at no cost to them), and reimbursement for their travel expenses.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |

<tr>
<td>American Association of Medical Colleges (Multiple locations)</td>
<td>The <strong>Post-baccalaureate Premedical Programs Database</strong> features ~275 national programs and allows users to apply a variety of filters, including: career-changer, academic record enhancer, State, Public or Private institution, certificate, special program focus, etc., to search for post-bac pre-med programs.</td>
<td>✓ Please refer to the program’s website or contact the respective administrator to review the eligibility criteria per program.</td>
<td>For more information, visit the <a href="#">website</a>. If you have additional questions, please send an email to the <a href="#">program</a>.</td>
</tr>
<tr>
<td>Broad Institute (Massachusetts)</td>
<td>The <strong>Broad Biomedical Post-baccalaureate Scholars (BBPS)</strong> program is a two-year program run by the Broad Diversity, Education and Outreach office. BBPS offers participants a comprehensive, structured, and immersive experience that includes groundbreaking research and academic and career guidance. The program is designed to diversify the biomedical research field and support the participants' development of knowledge, expertise, and skills both inside and outside the lab. BBPS participants perform research as paid, full-time Associate Computational Biologists or Research Associates, working alongside leading scientists.</td>
<td>✓ US citizen or permanent resident. ✓ Completed a four-year university or college degree not more than one year before the start of the program. ✓ Attained a minimum GPA of 3.3. ✓ Participation in significant prior research experience ✓ Interest in pursuing a graduate degree (MA/MS, PhD or MD-PhD only) upon completion of the program.</td>
<td>Participants will receive a salary of $43,600-$64,000 (depending on experience and skills) and access to health benefits. For more information, visit the <a href="#">website</a>. If you have additional questions, please send an email to the <a href="#">program</a>.</td>
</tr>
<tr>
<td>Center for Disease Control and Prevention (Multiple locations)</td>
<td>The <strong>Public Health Associate Program (PHAP)</strong> is a two-year training program for early-career public health professionals who have a recent bachelor’s or master’s degree and an interest in public service and public health. Associates gain hands-on experience working alongside professionals across a variety of public health settings such as: chronic disease prevention and health promotion, environmental health, global migration and quarantine, immunization, injury and violence prevention, maternal/child health, and public health preparedness.</td>
<td>✓ Must have completed at minimum a bachelor’s degree from an accredited college or university within the previous two years OR possess a master’s degree from an accredited academic institution. ✓ U.S. citizen, permanent resident or US nationals with a keen interest in public health.</td>
<td>During the first year of the program, associates earn a salary and benefits equivalent to a GS-5, Step 1 federal employee (including cost of living adjustments). In the second year, associates are eligible to earn a salary equivalent to a GS-7, Step 1 federal employee (including cost of living adjustments). The federal wage table can be found <a href="#">here</a>. For more information, visit the <a href="#">website</a>. </table>
| Minneapolis Heart Institute Foundation (Minnesota)    | **The MHIF Summer Research Internship Program – Clinical Cardiology** is one of the most outstanding and unique internship opportunities available to undergraduate premed students and those studying in other health care disciplines. Working with a physician and a research staff mentor, interns contribute to clinical research studies and publications that impact patient care. During their 12-week internships, interns spend nearly 11 days on shadowing, observations and other field trips.  | ✓ Preference will be given to undergraduate rising juniors or seniors; however, post-baccalaureate students are eligible to apply.  
✓ Enrolled in a U.S.-based accredited degree program in a health care or related discipline.  
✓ Have GPA of 3.6 or above.  
✓ U.S. citizen or permanent resident.  | Students will be paid $480/week (40 hrs/week) for their participation in the internship. The program is not able to offer housing support. However, scholarship opportunities may be available for accepted applicants who need housing/transportation support.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#).  |
| National Heart, Lung and Blood Institute (Iowa)       | **The Iowa Summer Institute in Biostatistics (ISIB)** Program at the University of Iowa College of Public Health is a 7-week program. The structure of the program is through case based instruction of real biomedical research, computer laboratory training, research projects, and clinical and translational research enrichment activities. Coursework will focus on clinical trials, big data, translational research, and statistical models used in the analysis of biomedical studies. The course will further serve as a fundamental building block for students to understand the importance of biostatistics and its synergistic place in the biomedical sciences. | ✓ College graduates who have not started a graduate program.  
✓ Academic minimum: 3.2 GPA.  
✓ Priority admission will be given to disadvantaged students and to students from small liberal arts colleges which do not offer substantial coursework in statistics or biostatistics.  
✓ Those majoring in mathematical or biological sciences are best suited for program.  | Students will receive roundtrip transportation, housing, meal allowance, and full access to university computing systems, libraries, and other academic and recreational facilities. Transferable college credit may also be possible.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to Terry Kirk. |
| National Heart, Lung and Blood Institute (Massachusetts) | **The Boston University Summer Institute for Research Education in Biostatistics (SIBS)** is a 6-week program in which students can learn about the growing biostatistics field by taking courses in two widely used statistical computing software and interacting with practicing biostatisticians, epidemiologists, and statistical geneticists. Participants will also have the opportunity working hands-on with actual collected data by the National Heart, Lung and Blood Institute. | ✓ Majoring in mathematics, science, or other quantitatively oriented areas of study.  
✓ Currently enrolled undergraduate students of junior or senior standing. Graduating seniors and beginning graduate students (M.S.) with intent to pursue biostatistics are welcome to apply.  
✓ U.S. citizen or permanent resident.  | Costs for tuition, supplies, and computer program licenses are covered by the program. Participants will receive a $1,000 stipend. Additionally, costs for some meals during the program will be provided.  
**For more information**, visit the [website](#).

| National Institutes of Health (District of Columbia) | The Introduction to Cancer Research Careers (ICRC) Program offers undergraduate, post-baccalaureate, graduate, and recent graduate students who are financially disadvantaged and/or from underrepresented populations in science an opportunity to participate in vital cancer research at the National Cancer Institute (NCI). Interns will attend seminars on topics related to basic, clinical, biomedical and behavioral research, human health, healthy lifestyles, and health disparities. Interns will also participate in professional development workshops. | ✓ Undergraduate student OR post-baccalaureate (within two years) OR graduate student.  
✓ U.S. citizen or permanent resident.  
✓ Academic minimum: 3.2 GPA.  
✓ Member of a group traditionally underrepresented in the sciences, as defined by NIH OR from a financially disadvantaged background. | The ICRI program provides a stipend based on participants’ academic level. Interns are responsible for securing housing. Travel to and from Bethesda is provided for out-of-state participants. Students are responsible for their own meals.  
For more information, visit the [website](#). If you have additional questions, please send an email to the [program](#). |
| National Institutes of Health (Maryland) | Intramural NIAID Research Opportunities (INRO) provides enthusiastic candidates with the opportunity to visit the NIH Main Campus in Bethesda, Maryland to engage with leading experts in biomedical research training opportunities in allergic, immunologic, or infectious diseases, and to learn more about the exciting research being conduction in the National Institute of Allergy and Infectious Diseases (NIAID). | ✓ U.S. citizen or permanent resident.  
✓ Graduating senior (undergrad or master's program) or have recently completed an undergrad or master's degree.  
✓ Academic minimum: 3.2 GPA.  
✓ Available for a full, one-year postbac fellowship in NIAID that begins on June 15 of visit year. | For the two day visit trainees will receive roundtrip airfare to/from Bethesda, MD, hotel accommodations, and a daily stipend.  
After the visit, postbac position offers are made by individual principal investigators.  
For more information, visit the [website](#). If you have additional questions, please send an email to the [INRO Coordinator](#). |
| National Institutes of Health (Maryland) | The Post-Baccalaureate Intramural Research Training Award (IRTA) program provides opportunities for recent college graduates to spend time engaged in biomedical research at the National Institutes of Health (NIH). Trainees work with some of the leading scientists in the world in an environment devoted exclusively to biomedical research. Fellowships are available in the more than 1,250 intramural laboratories of the National Institutes of Health (NIH). The duration of the program is typically one year; it can be extended for one additional year depending on satisfactory trainee performance and continued availability of funds. | ✓ U.S. citizen or permanent resident.  
✓ Graduated from an accredited U.S. college or university with a bachelor’s degree less than THREE years prior to the date they begin the program, OR individuals who are more than 3 years past the receipt of their bachelor’s degree but received a master's degree less than SIX MONTHS before they begin the program.  
✓ Candidates must intend to apply to graduate or professional school during their tenure at the NIH. | The stipend for post-baccalaureate trainees is adjusted annually, the level depends on prior experience acquired AFTER completion of the bachelor's degree. For details, see the [Trainee Stipends](#) page.  
For more information, visit the [website](#). If you have additional questions, please send an email to the [program](#). |

| NASA STEM Programs (Multiple locations) | NASA’s One Stop Shopping Initiative (OSSI) is an innovative solution to support the STEM (Science, Technology, Engineering, and Mathematics) workforce. NASA’s internship programs are being phased into OSSI:SOLAR, including national programs, and programs that are unique to a specific NASA Center. | ✓ U.S. citizen.  
✓ Additional eligibility requirements map apply depending on the specific program. | “Note: students may identify opportunities of interest; however they cannot request to be considered for a specific internship program(s). For more information, visit the website. |
| Post-baccalaureate Research Education Program (PREP) (Alabama) | The University of Alabama at Birmingham (UAB) hosts a unique one to two-year training opportunity for students seeking graduate degrees in biomedical or behavioral science. Students will be paired with a faculty mentor and receive instruction in academic writing, math, and test-taking in order to gain the necessary experience for acceptance into science programs in leading graduate schools. | ✓ Received a baccalaureate (4-year) degree in the past three years.  
✓ Not currently enrolled in graduate school.  
✓ U.S. citizen or permanent resident. | Students will receive a $27,200 stipend, plus health insurance and tuition for up to 11 credit hours of academic instruction. For more information, visit the website. If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) (California) | The University of California, Santa Cruz, provides a 1-year training program for recent graduates to conduct research in a UCSC faculty member’s laboratory, take a GRE or MCAT preparation course, participate in research seminars and journal clubs, and travel to a conference to present their own research. | ✓ U.S. citizen or permanent resident.  
✓ Graduated OR in the process of graduating with a baccalaureate degree in a biomedically-relevant science or engineering discipline from an accredited U.S. college or university, no more than 36 months prior to applying to PREP.  
✓ Must belong to groups considered underrepresented in the biomedical sciences | Students will receive a salary and benefits. For more information, visit the website. If you have additional questions, please send an email to Dr. William Sullivan. |

| Post-baccalaureate Research Education Program (PREP) (Connecticut) | Yale University offers two PREP programs for recent bachelor's degree recipients from traditionally underrepresented backgrounds who are highly motivated to pursue a research career. The BBS PREP (Biological and Biomedical Sciences) and ESI PREP (Humanities, Social Sciences, Physical Sciences and Engineering) are both programs that help trainees gain the research skills and academic credentials needed to become competitive applicants to, and successful students in, highly selective doctoral programs. | ✓ U.S. citizen or permanent resident.  
✓ Received an undergraduate degree in a biomedically-relevant science, no more than 3 years prior to applying to the program.  
✓ Must apply to PhD programs in the biomedical sciences after completing the program. | Scholars will receive a $32,000 salary and additional financial support that covers tuition for one course per semester, health insurance, GRE preparation course, purchase of a laptop, and travel support to attend one national conference. Students must reside in Yale campus housing, in which their salary is expected to cover housing, meal plan, and other living expenses.  
For more information, visit the website.  
If you have additional questions, please send an email to Dr. Michelle Nearon. |
| Post-baccalaureate Research Education Program (PREP) (Georgia) | The University of Georgia PREP program is a one-year training opportunity for scholars to conduct research specific to infectious diseases. Recent post-baccalaureate students to provide them with the skills necessary to excel in graduate training programs in the life sciences. The program goal is to equip those with the desire and motivation to become the next generation of life science researchers with the credentials required to achieve this. In addition to their research experience, scholars will receive assistance in preparing a competitive application for graduate programs, including GRE preparation and an opportunity to present work at a national or international scientific conference. | ✓ U.S. citizen or permanent resident.  
✓ Graduated with a baccalaureate degree in a life science from an accredited U.S. college or university, no more than 36 months prior to applying to PREP. Not currently enrolled in a graduate degree program.  
✓ Belong to a group considered underrepresented in biomedical science careers (as defined by the NIH).  
✓ Intend to apply to a leading PhD or MD/PhD program during the PREP training period. | PREP scholars will receive a competitive salary with access to health insurance and funding to attend and present research at (at least one) national or international scientific conference.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) (Illinois) | Underrepresented students who hold a recent bachelor's degree in the biomedical sciences are invited to work as lab technicians for one year at the University of Chicago. Scholars will participate in academic, cultural, and social activities, including lab rotations, travel to a national conference, weekly Journal Club meetings, a writing and ethics course, and workshops on GRE preparation and applying for graduate programs. | ✓ U.S. citizen or permanent resident.  
✓ Intend to pursue a research doctorate upon completion of the program. | All PREP Scholars receive an NIH stipend for their work as lab technicians, as well as employee benefits from the University of Chicago. The benefits include health insurance and other staff benefits such as free computer courses and personal and professional counseling.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |

| Post-baccalaureate Research Education Program (PREP) (Indiana) | **Indiana University – Purdue University Indianapolis** PREP program is a one-year training program for scholars intending to pursue graduate programs in biomedical engineering, clinical psychology, kinesiology, and neuroscience fields. Scholars will conduct intensive research with a lab mentor, create a personalized development plan to apply to competitive biomedical or behavioral science programs, and have the opportunity to present research at a national conference. | ✓ U.S. citizen or permanent resident.  
✓ Graduated with a science baccalaureate degree from an accredited US college or university less than 36 months prior to the date of application submission.  
✓ Academic minimum: 3.0 GPA.  
✓ Member of an underrepresented minority group OR individual with a disability OR individual from a disadvantaged background.  
✓ Committed to carrying out research to reduce health disparities. | Scholars will receive a salary of $35,568, health insurance, and benefits.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) (Kansas) | **University of Kansas** PREP program provides up to two years of research experience in a scientific laboratory. The program is designed to prepare students for graduate study; therefore, scholars will also receive personalized academic counseling, assistance with graduate school selection, travel to national meetings, an annual research symposium, and opportunities to enhance research and academic skills. | ✓ U.S. citizen or permanent resident.  
✓ Received a bachelor's degree within the last three years.  
✓ Intend to apply to a leading PhD or MD/PhD program during the PREP training period. | Participants will receive one year of financial support as a GRA/KU employee (stipend: $27,690) as well as an allowance for travel to national meetings.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the Program Coordinator, Kathy Denning. |
| Post-baccalaureate Research Education Program (PREP) (Maryland) | The PREP program at **Johns Hopkins University School of Medicine** offers a training opportunity for scholars to conduct research, attend workshops to improve spoken communication and scientific writing, and prepare for the GRE or MCAT exam to strengthen their application to apply to graduate programs. | ✓ U.S. citizen or permanent resident.  
✓ College seniors OR recent graduates with a bachelor's degree in biomedical science.  
✓ Academic minimum: 3.3 GPA in science and math. | Scholars will receive an annual salary of $34,000 plus health, retirement, tuition and other benefits  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |

| Post-baccalaureate Research Education Program (PREP) (Massachusetts) | The University of Massachusetts, Amherst PREP program encourages students of underrepresented groups who hold recent baccalaureate degrees to pursue PhDs in biomedical sciences. Participants work in laboratories and participate in professional development activities. PREP is a one-year internship with the goal of strengthening the research skills and academic competitiveness of participants for pursuit of a graduate degree. | ✓ U.S. citizen or permanent resident.  
✓ Recent college graduate (received baccalaureate degree within the past 3 years).  
✓ Intend to pursue a research doctorate upon completion of the PREP experience.  
✓ Belong to a group considered underrepresented in biomedical science careers (as defined by the NIH). | Interns will receive a competitive stipend, tuition, and 95% of healthcare coverage.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Post-baccalaureate Research Education Program (PREP) (Massachusetts) | The Boston University School of Medicine PREP program is a year-long preparatory program for recent bachelor’s degree recipients seeking entry into competitive PhD training programs. BU PREP is designed to foster mentoring relationships that will enhance personal and scientific development for members of historically underrepresented groups in the biomedical sciences. Scholars will be paired with BUSM’s outstanding faculty, have access to state-of-the-art research facilities, and work closely with an advising team to create an individualized career plan directed toward doctoral graduate school entry and success. | ✓ US citizen or permanent resident.  
✓ Received an undergraduate degree in a biomedically-relevant science, no more than 3 years prior to applying to the program.  
✓ Must apply to PhD programs in the biomedical sciences after completing the program. | Scholars will receive an annual stipend.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Post-baccalaureate Research Education Program (PREP) (Massachusetts) | The PREP program at Tufts University offers one- to two-year research apprenticeships for recent graduates who are interested in pursuing research careers in the biomedical sciences. Trainees work on a hypothesis-driven problem in a field of their choosing. During this research apprenticeship they are mentored by members of the GSBS Graduate Faculty. Trainees also participate in classes, workshops and seminars. | ✓ U.S. citizen or permanent resident belonging to an underrepresented group (including, but not limited to: African-Americans, Hispanics, Native Americans, people with disabilities, and members of groups that are economically or socially disadvantaged). | Trainees receive a salary of $33,500 and health insurance.

| Post-baccalaureate Research Education Program (PREP) | The University of Michigan PREP program provides a one-year research experience and extensive academic guidance to individuals from underrepresented groups in order to strengthen participant's candidacy for admission to the nation's strongest PhD programs and gain PhD degrees in biomedically-relevant sciences. In addition to research, PREP students participate in a variety of activities, including a Graduate Record Exam (GRE) prep course, seminars and journal clubs, one or two University of Michigan graduate or undergraduate courses, and group meetings to present research projects and discuss graduate school/career options. | ✓ U.S. citizen or permanent resident.  
✓ Graduated or in the process of graduating with a baccalaureate degree in a biomedically-relevant science from an accredited U.S. college or university, no more than 36 months prior to applying to PREP.  
✓ Belong to a group considered underrepresented in the biomedical sciences (as defined by the NIH)  
✓ Plan to apply to a PhD program in a biomedically-relevant science after successful completion of PREP. | Students will receive a full tuition scholarship, salary ($28,000), and benefits (health and dental insurance). PREP scholars may use up to $1,500 for travel to a domestic scientific meeting or conference where they are presenting.  
**For more information**, visit the [website](http://www.prep-michigan.org).  
If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) | The PREP program at the Mayo Clinic offers an intense mentored research experience in basic science or translational research in the top laboratories at Mayo Clinic. Scholars will attend special seminars and graduate-level courses to expand each student's knowledge base so they can begin to apply basic science knowledge to biomedical research. Additionally, trainees receive guidance to assist with successful continuation into a PhD or MD/PhD program. | ✓ U.S. citizen or permanent resident.  
✓ Underrepresented student who has obtained a bachelor’s degree within the past three years, or high school senior about to graduate in a biomedical science discipline who is planning to pursue a PhD degree in biomedical science. | Scholars will receive a salary, as well as low-cost, comprehensive medical coverage through the Mayo Clinic. A second year of support may be available.

| Post-baccalaureate Research Education Program (PREP) (Missouri) | The **University of Missouri-Columbia (MU)** PREP program prepares students for PhD study leading to research careers in the biomedical sciences, including areas that address health disparities in minority populations. Scholars will conduct faculty-mentored research leading to publication of research results and presentation at national conferences. In addition, scholars will receive rigorous academic preparation, including participation in graduate courses, GRE test preparation, graduate school planning, and research seminars, as well as personal development. | ✓ U.S. citizen, national, or permanent resident.  
✓ Member of a racial or ethnic group underrepresented in biomedical research, OR from a disadvantaged background, OR have a disability.  
✓ Received a baccalaureate degree in a science major within the past 36 months.  
✓ Intend to apply to a PhD granting program in a biomedical-related field after successful completion of PREP. | MU PREP scholars will receive a salary at $27,200, including all educational fees, health insurance, and support for travel to two scientific conferences.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to Dr. John David. |
| Post-baccalaureate Research Education Program (PREP) (New Mexico) | The **University of New Mexico (UNM)** PREP program is designed to enhance the ability of individuals in the biomedical sciences to gain entry to, and succeed in, nationally-recognized PhD programs. PREP is aimed at individuals from underrepresented groups in the sciences who have recently received a Bachelor’s degree. These individuals will either have relatively little laboratory experience or will be changing research fields between their BS and PhD courses. To enhance scholars’ competitiveness for graduate school, PREP also offers GRE classes and short training programs aimed at acquainting scholars with the expectations and challenges of graduate school. | ✓ U.S. citizen or permanent resident.  
✓ Must be a member of an underrepresented identity group, as defined by NIH and/or individuals with disabilities.  
✓ Recipient of a Bachelor’s degree within 36 months prior to acceptance into the PREP program.  
✓ Committed to pursuing a PhD in a biomedical research field and to performing research that will help reduce health disparities.  
✓ Have a tangible need to complete an additional year of training before applying to graduate school.  
✓ Academic minimum: 3.0 GPA. | UNM PREP scholars will receive an annual salary of $27,200, plus health and dental benefits. PREP will also cover the cost of tuition for courses that are required by the scholar to become familiar with their research.

|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Post-baccalaureate Research Education Program (PREP) (New York)     | The PREP program at the University of Rochester provides an opportunity to gain research experience in microbiology, virology or immunology as a full-time laboratory technician under the mentorship of a program faculty member for one year, with the possibility of an additional year of support. Scholars will also participate in an individually-tailored and tightly focused academic program; each trainee will have an opportunity to take a limited number of classes and participate in ancillary training and enrichment activities. | ✓ U.S. citizen or permanent resident.  
✓ Member of a group traditionally underrepresented in the sciences, as defined by NIH.  
✓ Received a baccalaureate degree in a science major within the past 36 months.  
✓ Intend to apply, within two years, for graduate education that will eventually lead to the research doctorate. | Scholars will receive an annual salary of $31,933.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to Dr. Elaine Smolock. |
| Post-baccalaureate Research Education Program (PREP) (New York)     | Albert Einstein College is offering a year-long training experience for scholars that are from underrepresented minority groups who are recent college graduates. In addition to conducting laboratory research, students will participate in career development seminars, receive advising with applications for PhD and MD/PhD programs, and receive mentorship from a faculty member. | ✓ U.S. citizen or permanent resident.  
✓ Completed undergraduate degree in a biomedical or behavioral science.  
✓ Interest in pursuing a PhD or MD/PhD degree. | Scholars will receive a competitive salary and benefits. Subsidized housing is available across the street from campus.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) (New York)     | The Mount Sinai PREP program offers one-to-two years of training to help scholars enhance their interest in and readiness for doctoral programs in biomedicine and research. Students will dedicate 75 percent of their time to laboratory research and 25 percent to a combination of courses, special work-in-progress seminars, skill development, and community-outreach activities. | ✓ U.S. citizen or permanent resident.  
✓ Graduated with a baccalaureate degree in a biomedically relevant science from an accredited U.S. college or university no more than 36 months prior to applying to a PREP.  
✓ Students from racial and ethnic groups who are underrepresented in health-related sciences, and individuals with disabilities or disadvantaged backgrounds are encouraged to apply. | Scholars will receive a competitive annual stipend. Health insurance is also provided. Travel awards are available for national meetings.

| Post-baccalaureate Research Education Program (PREP) (North Carolina) | The University of North Carolina- Chapel Hill offers a yearlong training opportunity for students interested in pursuing a PhD in the biological and biomedical sciences. Scholars will conduct research with a faculty mentor onsite, in addition to participating in summer courses on the critical analysis of scientific literature and hands-on laboratory skills training. All PREP scholars take a graduate level course at UNC. Monthly socials, luncheons, and other events provide regular opportunities for PREP scholars to network with one another and the greater UNC research community. | ✓ Recent baccalaureate degree from an accredited U.S. university (within the last 3 years) in the biomedical or behavioral sciences.  
✓ Member of a racial or ethnic group underrepresented in biomedical research, OR from a disadvantaged background, OR have a disability.  
✓ U.S. citizen or permanent resident. | Scholars will receive a $29,000 stipend, full tuition, health insurance and travel support to attend a scientific conference.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) (Ohio) | The Ohio State University Discovery PREP program is a yearlong research opportunity for recent undergraduate graduates from underrepresented groups to gain additional research experience and to become competitive applicants for graduate programs in the biomedical sciences. In addition to conducting research, students will attend professional development workshops to successfully apply to PhD programs. | ✓ U.S. citizen or permanent resident.  
✓ Recent baccalaureate graduates with a degree in a biomedical related science no more than 36 months prior to their selection for participation in the program.  
✓ Must belong to groups considered underrepresented in the biomedical sciences, including individuals from underrepresented racial and ethnic groups, individuals with disabilities, and individuals from disadvantaged backgrounds (socially, culturally, economically). | Students will receive a monthly stipend, plus health and retirement benefits. Prepaid airfare is provided for travel to a conference or national meeting.

| Post-baccalaureate Research Education Program (PREP) (Ohio) | The PREP program at Case Western Reserve University offers a one- or two-year coordinated program of study to increase the likelihood of success in a research-based graduate program. PREP Scholars enjoy mentored research experience, a tailor-made program of study, GRE test prep workshops, and a variety of venues to interact with and learn from some of the best researchers in the world. | ✓ U.S. citizen or permanent resident.  
✓ An underrepresented minority, disabled, or disadvantaged student as defined by the NIH.  
✓ Graduated with a baccalaureate degree in a biomedical-relevant science from an accredited US college or university less than 36 months prior to the date of application submission.  
✓ Commitment to pursuing a PhD in the biomedical sciences. | Scholars will receive a salary of $27,200 per year, including fringe benefits and health insurance.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to Paul MacDonald. |
| Post-baccalaureate Research Education Program (PREP) (Pennsylvania) | The University of Pennsylvania PREP program provides a one- to two-year research experience for students who have completed college and are interested in pursuing a doctoral degree in the biomedical sciences. This program provides significant research experience, along with prep for applying to and succeeding in graduate school. The goal of the program is to increase understanding in the principles and practices of biomedical research. | ✓ U.S. citizen or permanent resident.  
✓ Member of a group traditionally underrepresented in the sciences, as defined by NIH.  
✓ Degree in a biomedical-relevant science from an accredited U.S. college or university and have graduated no more than 36 months prior to the start of the program.  
✓ Intend to apply to a graduate program within two years of beginning the PREP program. | PREP scholars receive a competitive stipend, including health insurance.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| Post-baccalaureate Research Education Program (PREP) (South Carolina) | The University of South Carolina PREP program allows students to spend up to two years working as an employee in a federally-funded biomedical research laboratory to learn the nature of research in general and specific biomedical techniques in particular. In addition, scholars will have an opportunity to take graduate-level biomedical courses and/or correct deficiencies in their undergraduate education through tutorials or appropriate coursework, learn about the ethics and responsibilities of biomedical research, and present their research at local and national meetings. | ✓ U.S. citizen or permanent resident.  
✓ Member of a group traditionally underrepresented in the sciences, as defined by NIH.  
✓ Have a degree in a biomedical-relevant science from an accredited U.S. college or university and have graduated no more than 36 months prior to the start of the program.  
✓ Intend to apply to a graduate program within two years of beginning the PREP program. | USC PREP scholars will receive a stipend of $28,000 per year. From this amount, scholars are expected to pay for mandatory health insurance unless the scholar has alternative insurance.  
For more information, visit the [website](#).  
If you have additional questions, please send an email to Richard Hunt. |

<tr>
<td>Post-baccalaureate Research Education Program (PREP) (South Carolina)</td>
<td>The Medical University of South Carolina PREP is a yearlong intensive research opportunity to provide scholars additional research experience, in addition to assisting with constructing competitive applications for graduate programs in the biomedical sciences. Students will conduct research, attend professional development workshops, and explore careers within the biomedical sciences field.</td>
<td>✓ U.S. Citizens or permanent residents with a keen interest in entering a PhD or MD/PhD program from populations underrepresented in the Biomedical Sciences, individuals with disabilities, or individuals from disadvantaged backgrounds. ✓ Must apply to a PhD granting program in a biomedical-related field after completing PREP program.</td>
<td>Scholars will receive an annual salary of $29,500, tuition, travel allowance, and reimbursement for health insurance up to $2,000. For more information, visit the website. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Post-baccalaureate Research Education Program (PREP) (Texas)</td>
<td>The Baylor College SMART PREP program is designed to help underrepresented college graduates prepare for graduate school. The program allows students to gain research experience and includes participation in a molecular and cellular biology course, weekly scientific development workshops, GRE test prep workshops, graduate school application workshops, and individual counseling on applying to PhD programs.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Completed baccalaureate degree within the last three years. ✓ Must be a member of an underrepresented group in science. ✓ Demonstrated interest in pursuing a PhD degree in the biomedical sciences.</td>
<td>PREP apprentices will receive a salary of $32,000 per year, plus benefits. For more information, visit the website. If you have additional questions, please send an email to the program.</td>
</tr>
<tr>
<td>Post-baccalaureate Research Education Program (PREP) (Virginia)</td>
<td>The Virginia Tech (VT) PREP program is for students interested in pursuing a research career in behavioral/biomedical sciences and engineering. VT-PREP supports students through individualized mentoring, foundation coursework, innovative research, and professional development essential to success in graduate school and competitive doctoral programs. Scholars spend 75 percent of their time in a mentored research program. Undergraduate and/or graduate course work occupies the remaining 25 percent of the scholar’s time. Also provided are academic seminars, technical workshops, graduate school preparation, and a GRE preparation program.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Have graduated within the last three years with a baccalaureate degree (BA or BS) with a minimum GPA of 2.8. ✓ Must be individuals from ethnic groups considered to be underrepresented by the Federal Government. ✓ Must be interested in pursuing a Ph.D. in Behavioral or Biomedical Sciences and Engineering within two years of admission into PREP.</td>
<td>PREP scholars will receive a $27,200 annual stipend, benefits, travel support to attend a workshop or present at a scientific meeting, and tuition scholarship. For more information, visit the website. If you have additional questions, please send an email to the program.</td>

</table>
| Post-baccalaureate Research Education Program (PREP) (Virginia) | The PREP Program at the Virginia Commonwealth University is a one-year biomedical research training program for recent college graduates from underrepresented groups who are considering graduate-level training in the biomedical sciences. The program provides scholars with a mentored research experience and the opportunity to develop technical and critical-thinking skills. | ✓ Graduated from an accredited college or university in the last 3 years prior to applying to program.  
✓ U.S. citizen, permanent resident or non-citizen national.  
✓ Interested in obtaining a PhD or MD/PhD degree.  | Participants will receive a stipend of $29,120.  
For more information, visit the website.  
If you have additional questions, please contact the program. |
| Post-baccalaureate Research Education Program (PREP) (Washington) | The University of Washington (UW) and Fred Hutchinson Cancer Research Center PREP seeks students who already hold baccalaureate degrees and wish to optimize their preparation for and successful completion of graduate studies leading to a PhD in biomedical sciences. The program is aimed at undergraduates who have great potential and enthusiasm for science, yet lack some tangibles (for example research experience) and are therefore less competitive for the most competitive biomedical graduate programs. The program will provide graduate school application assistance as well as mentored laboratory experience. | ✓ U.S. citizen or permanent resident.  
✓ Have graduated with a baccalaureate degree in biomedically-relevant science from an accredited U.S. college or university.  
✓ Academic minimum: 3.0 GPA.  
✓ Members of groups underrepresented in biomedical sciences, including economically disadvantaged students and those with disabilities. | PREP scholars will receive a salary of $30,000/year, plus benefits, an educational allowance, and travel support to attend one national conference.  
For more information, visit the website.  
If you have additional questions, please send an email to Dr. Gabriel Varani. |
| USA Jobs (Multiple locations)                        | USAJOBS is the U.S. Government's official system/program for Federal jobs and employment information. This site serves as a search engine for jobs with the U.S. Government. | ✓ Please refer to the program’s website or contact the respective administrator to review the eligibility criteria per program. | For more information, visit the website. |
| Virginia Commonwealth University (Virginia)          | The Summer Academic Enrichment Program is a 6-week program designed to enhance the academic preparation of students pursuing enrollment in a health professions school. Students will choose from four tracks: dentistry, medicine, pharmacy, or physical therapy. Each track includes foundational courses, learning workshops, health disparities seminars, mock interviews, and networking events. | ✓ U.S. citizen or permanent resident.  
✓ Post-baccalaureate students who are preparing to apply to a dentistry, medicine, pharmacy or physical therapy health professional school or program.  
✓ Academic minimum: 2.75 GPA.  
✓ Strong interest in attending health professions school at VCU. | A modest stipend is provided to participants.  
For more information, visit the website.  
If you have additional questions, please send an email to the program. |

<td>Harborview Medical Center (Washington)</td>
<td>Harborview Injury Prevention &amp; Research Center’s (HIPRC) <strong>Pediatric Injury Prevention Student Internship Training (INSIGHT) program</strong> is an intensive, eight-week summer internship that provides paid research experience and mentorship for students who are interested in injury research. Participants are matched to research projects and partnered with health sciences faculty from across the University of Washington and work alongside peers and health professionals from an array of disciplines. Past research areas include elucidating the risk factors and causes of injuries, injury prevention strategies, acute and chronic care of injured patients, outcomes from trauma, and interventions to return the injured individual to their full potential.</td>
<td>✓ U.S citizen or permanent resident and are eligible to work in the U.S or hold a valid student visa or have DACA status. ✓ Minimum cumulative GPA of 3.0 is preferred. ✓ Current graduate students or students entering a graduate program in Fall 2022 are given preference.</td>
<td>Interns will receive a $3,200 stipend. Students are independently responsible for arranging their housing, meals and transportation. The UW offers some discounted summer housing within the dorms on campus. Students accepted into the program will be sent details of on campus housing. Travel reimbursement awards are available for individuals who qualify. Recipients of these awards will be notified upon acceptance into the program. For more information, visit the website. If you have additional questions, please email the program.</td>
</tr>
<tr>
<td>Hispanic Serving Health Professions Schools (Virginia)</td>
<td>The <strong>HSHPS Graduate Fellowship Training Program (GFTP)</strong> provides paid and unpaid training opportunities for graduate and doctoral students, and recent graduates, interested in working on Hispanic health research. Fellows are placed throughout the United States and Latin America within government agencies and academic institutions. All HSHPS fellows work alongside a mentor, an experienced researcher or senior staff member; assist with a research project as it relates to minority health issues; and participate in a series of professional development seminars. This program strives to assist individuals to develop skills to work with Hispanic and other minority groups in government and academia, pursue higher degrees, publish research, and stay connected with the HSHPS network.</td>
<td>✓ U.S. citizen or permanent resident. ✓ Ethnic minority (American Indian, Native Alaskan, Asian and Pacific Islander, Black, or Hispanic) are <em>highly encouraged</em> to apply.</td>
<td>Students may receive a stipend to cover travel, housing, and additional costs, but the amount will vary according to the program. For more information, visit the website. If you have additional questions, please email the program manager.</td>

| **Massachusetts General Hospital (Massachusetts)** | The goal of the **Summer Research Trainee Program (SRTP)** is to build a pipeline of under-represented in medicine, college and medical school students who are interested in academic biomedical research careers. The SRTP will pair students with a preceptor in this 8-week program. Preceptors will provide guidance and instruction in techniques necessary to address current problems in science and medicine. | ✓ U.S. citizen or permanent resident.  
✓ Graduate student OR rising 1st year medical student OR first-year medical student.  
✓ Member of an underrepresented group in medicine. | A living stipend of $5,000 for food and other necessities is provided along with housing costs (lodging arrangements provided near the hospital).  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| **Michigan Institute for Clinical and Health Research (MICHR) (Michigan)** | **MICHR** offers a summer research program for pre-doctoral students in health-related professional degree programs at U-M as well as at other U.S. institutions studying in these fields. The 10-week program is designed to introduce students to research early in their courses of study, and provides hands-on research experiences in health disparities or clinical research. Students will learn the fundamentals of research methods through individualized and team-based learning experiences. The program may serve as an internship for students who need to fulfill such requirements. | ✓ U.S. citizen or permanent resident  
✓ Currently enrolled in health-related professional degree or master’s degree programs at U-M and other U.S. institutions.  
✓ Students may not receive additional federal funding during this program | Students will receive a stipend to support full-time commitment.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| **National Heart, Lung and Blood Institute (Iowa)** | The **Iowa Summer Institute in Biostatistics (ISIB)** Program at the University of Iowa College of Public Health provides a 7-week opportunity for students to take a 3-semester hour introductory biostatistics course and to conduct research with a project team and faculty mentor. Students will also be exposed to informational workshops including scholarships, training grant programs, and assistantships in Biostatistics and Public Health fields. | ✓ Graduating seniors and beginning graduate students with intent to pursue biostatistics are welcome to apply.  
✓ Academic minimum: 3.2 GPA.  
✓ Members of traditionally underrepresented minority groups and students from small liberal arts colleges that do not offer substantial coursework in statistics or biostatistics are encouraged to apply. | Students will receive roundtrip transportation, housing, meal allowance, and full access to university computing systems, libraries, and other academic and recreational facilities. Transferable college credit may also be possible.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to [Terry Kirk](#). |

</table>
| National Heart, Lung and Blood Institute (North Carolina) | **The Summer Institute in Biostatistics (SIBS)** Program at North Carolina State University offers a 6-week program for students to learn about principles of applied biostatistics, gain hands-on learning by analyzing actual data, and interact with practicing biostatisticians and physicians. Students may also earn college credit as part of their participation in the program. | ✓ First-year graduate students are eligible, but priority will be given to undergraduates.  
✓ Majoring in mathematics, science, or other quantitatively oriented areas of study.  
✓ U.S. citizen or permanent resident. | Housing, meals, travel expenses to and from the program, and some extracurricular activities are covered. Participants will also have access to university computing systems and libraries.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| National Institutes of Health (District of Columbia) | **The Introduction to Cancer Research Careers (ICRC)** program gives highly qualified graduate and recent graduate students the opportunity to participate in vital cancer research at the National Cancer Institute (NCI). Selected candidates will have the opportunity to interview with top NCI Principal Investigators and potentially experience a summer or post-baccalaureate fellowship in an NCI research laboratory or office. The ICRC Program highly encourages individuals from underrepresented populations and disadvantaged backgrounds to apply. | ✓ U.S. citizen or permanent resident.  
✓ Cancer-related research interest from an underrepresented ethnic group.  
✓ Academic minimum: 3.2 GPA.  
✓ Demonstrate current or past research experience.  
*Former NCI fellows are not eligible to apply.* | The CRI program provides a stipend that is based on participants’ academic level. Housing is provided to students who are financially eligible. Travel to and from Bethesda is provided for out-of-state participants. Students are responsible for their own meals.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| National Institutes of Health (Maryland) | **The Division of Cancer Epidemiology and Genetics** hosts an 8 to 10-week research experience designed for students interested in exploring careers in cancer epidemiology and genetics. Students may also attend lectures offered under the NIH Summer Seminar Series, participate in DCEG meetings and seminars, attend formal NIH lectures, and participate in the DCEG Poster Day. | ✓ Graduate students (that is, individuals working towards a Ph.D. or master's degree) and Professional school (medical, dental, pharmacy, etc.) students.  
✓ U.S. citizen or permanent resident. | Participants will receive a stipend based on academic level. Students are responsible for housing, meals, and transportation. *Note: Nearby housing is available.  
**For more information**, visit the [website](#).  
If you have additional questions, please send an email to the program. |
| National Institutes of Health (Maryland) | Participants in the **Summer Internship Program (SIP)** work one-on-one with some of the leading scientists in the world. Trainees on the main campus in Bethesda, MD will attend a lecture series featuring distinguished NIH investigators, informal lunchtime talks on training for research careers, and participate in a trainee poster session. | ✓ Enrolled at least half-time in and accredited college or university as a graduate or professional student at the time of application.  
✓ U.S. citizen or permanent resident. | The stipend for trainees is adjusted annually and based on academic level.  
**For more information** about the specific programs offered, visit the [website](#).  
If you have additional questions, please send an email to the program. |

| NASA STEM Programs (Multiple locations) | NASA’s **One Stop Shopping Initiative (OSSI)** is an innovative solution to support the STEM (Science, Technology, Engineering, and Mathematics) workforce. NASA’s internship programs are being phased into OSSI:SOLAR, including national programs, and programs that are unique to a specific NASA Center. | ✓ U.S. citizen.  
✓ Additional eligibility requirements may apply depending on the specific program. | *Note: students may identify opportunities of interest; however they cannot request to be considered for a specific internship program(s). For more information, visit the [website](#). |
| Pathways to Science (Multiple locations) | **Pathways to Science** supports pathways to science, technology, engineering, and mathematics [STEM] fields. The program places a particular emphasis on connecting groups traditionally underrepresented in STEM fields with programs, funding, mentoring, and resources. Pathways to Science hosts a website that enables users to search for high school and undergraduate summer research opportunities, graduate fellowships, and postdoctoral positions. | ✓ Please refer to the program's website or contact the respective administrator to review the eligibility criteria per program. | The stipend is adjusted annually. For more information, visit the [website](#). |
| Roswell Park Cancer Institute (New York) | The **Summer Research Experience Program in Oncology** is an 8-week immersive summer research experience program at an NCI-designated comprehensive cancer center. During the experience, first-year medical and physician assistant students will: experience scientific and clinical research by conducting a mentored research project of their choosing; explore clinical operations and role of clinical trials and translational research in advancement of cancer medicine; present summer research results in a capstone poster presentation; and develop an understanding of the multi-disciplinary and translational approach to developing cancer treatments and interventions. | ✓ Be enrolled in your first year of medical, PA or nursing BSN program at the time of application.  
✓ Be in good standing with your academic program  
✓ U.S. citizen or permanent resident. | Students receive a $4,800 subsistence allowance to manage across living expenses and paying for lodging*  
*Out-of-town students have the option to find their own lodging (a list will be provided at the time of acceptance). For more information, visit the [website](#).  
If you have additional questions, please contact the program. |

<tr>
<td>San Francisco Department of Public Health</td>
<td>The <strong>San Francisco Health Network Behavioral Health Services Internship Program</strong> places trainees within the Adult/Older Adult and Children's Civil Service Clinics around the city of San Francisco. In these placements trainees will provide a range of health services. Along with required supervision hours, trainees have weekly didactic seminars, clinical case consultations and in-service trainings.</td>
<td>✓ Must be enrolled in a graduate program at an <strong>approved school</strong> to be eligible to participate. ✓ Please refer to the program’s website or contact the respective administrator to review the eligibility criteria per program.</td>
<td>Stipend is available to students training in behavioral health and substance use disorder treatment programs, refer to the program’s website for more information. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please contact Ryan Fuimaono.</td>
</tr>
<tr>
<td>San Francisco Department of Public Health</td>
<td>The <strong>Office of Policy and Planning at the San Francisco Department of Public Health (SFDPH)</strong> offers non-clinical, unpaid internships for individuals seeking work experience in research and policy. This internship provides practical learning experience for graduate students interested in public health, public policy, and related fields. Internships are designed to expose interns to careers in public service at the county level with support for professional development with supervising Office of Policy and Planning staff.</td>
<td>✓ Must me currently enrolled in a graduate degree program in an accredited college or university. ✓ Maintain a “C” average or above. ✓ Interns must be proficient in the Microsoft Office suite of programs (e.g., Microsoft Word, Excel, and PowerPoint).</td>
<td>This internship is unpaid. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please contact Patrick Chang.</td>
</tr>
<tr>
<td>Siemens Foundation-PATH (Washington)</td>
<td>The Siemens Foundation has partnered with PATH, a leading global health organization to launch the <strong>Siemens Foundation PATH Fellowship Program</strong>. The program engages science, technology, engineering, and math (STEM) students in innovative, hands-on assignments that serve society by accelerating high-impact, low-cost solutions to some of the world’s most pressing health needs. Based in PATH’s Seattle, Washington, office, fellows are provided a meaningful research and laboratory experience and exposed to career opportunities in global health.</td>
<td>✓ Currently enrolled graduate student at an accredited institution. ✓ Legally authorized to work in the U.S. ✓ Minimum of 1 to 2 years of prior laboratory research experience.</td>
<td>Students will receive a $3,000 stipend per month, in addition to $1,400 per month for housing (for those not currently based in Seattle) <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program.</td>

<tr>
<td>Siteman Cancer Center (Missouri)</td>
<td>Siteman Cancer Center at Barnes-Jewish Hospital and Washington University School of Medicine invites graduate students to participate in the <strong>Leah Menshouse Springer Summer Opportunities Program</strong>. The program is designed to provide students with hands-on cancer research experience for 10 weeks over the summer. Opportunities range from basic science research to clinical research to prevention/control and population research. In addition to completing a research project with a faculty mentor, participants also engage in a variety of other activities as part of the program, including tours of state-of-the-art cancer treatment and research facilities and weekly seminars on current areas of research and career building tools.</td>
<td>✓ U.S. citizen or permanent resident.  ✓ Currently enrolled in graduate program at an accredited institution currently or intending to pursue MD and/or PhD training.  ✓ Diversity in academic study and research is key to scientific discovery, students with diverse backgrounds and experiences are strongly encouraged to apply.</td>
<td>Students will receive a $6,200 stipend. Participants are responsible for their travel and housing. Housing is available on campus for out-of-town participants at summer term rates as space allows. For more information, visit the <a href="#">website</a>. If you have additional question, please send an email to the <a href="#">program</a>.</td>
</tr>
<tr>
<td>St. Jude Children’s Research Hospital (Tennessee)</td>
<td>The <strong>Pediatric Oncology Education program (POE)</strong> offers a unique opportunity for students preparing for careers in the biomedical sciences, medicine, nursing, pharmacy, psychology, or public health to gain biomedical and oncology research experience. The POE program provides a short-term training experience in either laboratory or clinical research. A primary goal of the program is to encourage students to pursue a career in cancer research, either as a laboratory-based scientist or a physician scientist.</td>
<td>✓ U.S. citizen or permanent resident.  ✓ Academic minimum 3.4 GPA in math and science, cumulative minimum: 3.4 GPA.  ✓ Currently enrolled graduate student preparing for a career in medicine or biomedical sciences.  ✓ Students with an interest in cancer research are particularly encouraged to apply.</td>
<td>Students will receive a $480 subsistence allowance, in addition to housing near campus. For more information, visit the <a href="#">website</a>. If you have additional questions, please send an email to Dr. Suzanne Gronemeyer.</td>

| Children's Hospital Los Angeles (California) | **The NIH-supported Summer Oncology Research Fellowship (SOFR) Program** is designed for medical students in the summer between their first and second year who are considering a biomedical career that involves cancer research. SORF immerses medical students in cutting-edge research within a team science framework in oncology and related fields. Students are matched with mentoring teams according to interests and research experience. | ✓ Medical students in the summer between their first and second year who are considering a biomedical career that involves cancer research. | Students will receive a stipend of $600/week for 10-12 weeks. Travel and housing assistance are available for qualifying students. Some students may also qualify for support for additional research done after completing the program.  
**For more information,** visit the [website](#).  
If you have additional questions, please send an email to the [program](#). |
| Harborview Medical Center (Washington) | **Harborview Injury Prevention & Research Center’s (HIPRC) Pediatric Injury Prevention Student Internship Training (INSIGHT) program** is an intensive, eight-week summer internship that provides paid research experience and mentorship for students who are interested in injury research. Participants are matched to research projects and partnered with health sciences faculty from across the University of Washington and work alongside peers and health professionals from an array of disciplines. Past research areas include elucidating the risk factors and causes of injuries, injury prevention strategies, acute and chronic care of injured patients, outcomes from trauma, and interventions to return the injured individual to their full potential. | ✓ U.S. citizen or permanent resident and are eligible to work in the U.S or hold a valid student visa or have DACA status.  
✓ Minimum cumulative GPA of 3.0 is preferred.  
✓ Current 1st year Medical students, or students entering medical school in Fall 2022 are given preference. | Interns will receive a $3,200 stipend. Students are independently responsible for arranging their housing, meals and transportation. The UW offers some discounted summer housing within the dorms on campus. Students accepted into the program will be sent details of on campus housing. Travel reimbursement awards are available for individuals who qualify. Recipients of these awards will be notified upon acceptance into the program.

| Indiana University (Multiple Locations) | **Indiana University** maintains a compilation of summer opportunities for first-year medical school students.                                                                                               | Please refer to the program's website or contact the respective administrator to review the eligibility criteria per program. | **For more information**, visit the [website](#).                                                                                                                                                                                                                     |
| Massachusetts General Hospital (Massachusetts) | The goal of the Summer Research Trainee Program (SRTP) is to build a pipeline of underrepresented in medicine, college and medical school students who are interested in academic biomedical research careers. The SRTP will pair students with a preceptor in this 8-week program. Preceptors will provide guidance and instruction in techniques necessary to address current problems in science and medicine. | U.S. citizen or permanent resident.  
Rising 1st year medical student OR 1st year medical student.  
Member of a group that is underrepresented in medicine. | A living stipend of $5,000 for food and other necessities is provided along with housing costs (lodging arrangements provided near the hospital).

<td>Minneapolis Heart Institute Foundation (Minnesota)</td>
<td>The <strong>MHIF Summer Research Internship Program – Clinical Cardiology</strong> is one of the most outstanding and unique internship opportunities available to undergraduate premed students and those studying in other health care disciplines. Working with a physician mentor and a research staff mentor, interns contribute to clinical research studies and publications that impact patient care. During their 12 week internships, interns spend nearly 11 days on shadowing, observations and other field trips. ✓ First-year medical students. ✓ Enrolled in a U.S.-based accredited degree program in a health care or related discipline. ✓ Have GPA of 3.6 or above. ✓ U.S. citizen or permanent resident.</td>
<td>Students will be paid $480/week (40 hrs/week) for their participation in the internship. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the program.</td>
<td></td>
</tr>
<tr>
<td>Roswell Park Cancer Institute (New York)</td>
<td>The <strong>Summer Research Experience Program in Oncology</strong> is an 8 week immersive summer research experience program at an NCI-designated comprehensive cancer center. During the experience, first-year medical and physician assistant students will: Experience scientific and clinical research by conducting a mentored research project of their choosing; Explore clinical operations and role of clinical trials and translational research in advancement of cancer medicine; Present summer research results in a capstone poster presentation; and Develop an understanding of the multidisciplinary and translational approach to developing cancer treatments and interventions. The goal of the program is to encourage entry into medical careers in technology and include a component of research. ✓ Be enrolled in the first year of medical, PA or dental school at the time of application. ✓ U.S. citizen or permanent resident.</td>
<td>Students receive a $4,800 subsistence allowance to manage across living expenses and paying for lodging* *Out-of-town students pay for lodging and stay at Canisius College dormitories, 10 minutes from the Roswell Park Cancer Institute Campus. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please contact the <a href="#">program</a>.</td>

<td>Siteman Cancer Center (Missouri)</td>
<td>Siteman Cancer Center at Barnes-Jewish Hospital and Washington University School of Medicine invites medical students to participate in the <strong>Leah Menshouse Springer Summer Opportunities Program</strong>. The program is designed to provide students with hands-on cancer research experience for 10 weeks over the summer. Opportunities range from basic science research to clinical research to prevention/control and population research. In addition to completing a research project with a faculty mentor, participants also engage in a variety of other activities as part of the program, including tours of state-of-the-art cancer treatment and research facilities and weekly seminars on current areas of research and career building tools.</td>
<td>✓ U.S. citizen or permanent resident.  ✓ Currently enrolled in medical school at an accredited institution.  * Diversity in academic study and research is key to scientific discovery, students with diverse backgrounds and experiences are strongly encouraged to apply.</td>
<td>Students will receive a $6,200 stipend. Participants are responsible for their travel and housing. Housing is available on campus for out-of-town participants at summer term rates as space allows. For more information, visit the <a href="#">website</a>. If you have additional question, please send an email to the <a href="#">program</a>.</td>
</tr>
<tr>
<td>St. Jude Children’s Research Hospital (Tennessee)</td>
<td>The <strong>Pediatric Oncology Education program</strong> at St. Jude Children's Research Hospital offers a unique opportunity for students preparing for careers in the biomedical sciences, medicine, nursing, pharmacy, psychology, or public health to gain biomedical and oncology research experience. The POE program provides a short-term training experience in either laboratory or clinical research. A primary goal of the program is to encourage students to pursue a career in cancer research, either as a laboratory-based scientist or a physician scientist.</td>
<td>✓ U.S. citizen or permanent resident.  ✓ Academic minimum 3.4 GPA  ✓ Currently enrolled graduate student preparing for a career in medicine or biomedical sciences.  ✓ Students with an interest in cancer research are particularly encouraged to apply.</td>
<td>Students will receive a $4,800 stipend, in addition to housing near campus. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to Dr. Suzanne Gronemeyer.</td>

<tr>
<td>University of Texas MD Anderson Cancer Center (Texas)</td>
<td>The <strong>1st Year Medical Student Program at MD Anderson Cancer Center</strong> offers a 10-week research program specifically designed for medical students who are interested in hands-on biomedical, translational or clinical research. The program includes: hands-on investigative scientific research under the direction of MD Anderson faculty; opportunities for clinical observation in various radiologic, medical and surgical disciplines; expert lecture series specifically tailored for medical students designed to expand student’s knowledge of various scientific fields and medical disciplines; interview skills workshop; and end-of-program presentation of research projects.</td>
<td>✓ Must have completed first year of medical school at an LCME- or COCA-accredited US medical school. ✓ Demonstrate an interest and aptitude for scientific investigation. ✓ Must be able to commit to the full 10-week program. ✓ International students are ineligible.</td>
<td>Participants receive a stipend to subsidize housing, meals, and travel expenses. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to the <a href="#">program</a>.</td>
</tr>
<tr>
<td>University of Texas MD Anderson Cancer Center/National Cancer Institute (Texas)</td>
<td>The <strong>CPRTP Summer Research Experience</strong> is an intensive, ten-week paid providing a research experience and mentoring for graduate and health professional students interested in cancer prevention research. Under the guidance of a faculty mentor, summer trainees will collaborate full-time on an independent research project and receive additional mentoring by a research staff of graduate students, postdoctoral fellows, research assistants and laboratory technicians. Students will also attend educational and career development activities.</td>
<td>✓ Currently enrolled graduate student OR health professional student (MD, dental, nursing, PharmD, etc.). ✓ U.S. citizen or permanent resident. ✓ Demonstrated interest in cancer prevention.</td>
<td>Participants will receive up to $15.00/hour. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to Kava Lewis.</td>
</tr>
<tr>
<td>University of Texas Medical School at Houston (Texas)</td>
<td>The <strong>UT Houston Summer Research Program</strong> provides first-year medical students enrolled at UT Houston Medical School with hands-on research experience supervised by faculty members from the medical school. The program includes workshops that supplement the research experience, including weekly seminars, certification courses in animal science, laboratory safety and radiation, an enrichment series, and tours of selected facilities and labs.</td>
<td>✓ Currently enrolled first-year UTHMS medical student. ✓ U.S. citizen or permanent resident. ✓ Must have completed 12 hours of coursework in a science discipline.</td>
<td>Students will receive a $2,500 stipend. A limited number of NIH grants offer a stipend of $5,200. Minimal on-campus housing is available at a discounted rate. <strong>For more information</strong>, visit the <a href="#">website</a>. If you have additional questions, please send an email to Linh Trinh.</td>
